PRE-QUALIFICATIONS FOR DISTRIBUTED ANTENNA SYSTEM IMPLEMENTATION - CHABOT COLLEGE Addenda: 0

4/6/21 2:00 PM 21-00862 Hayward **School**
 Plan Issuer: Chabot-Las Positas Community College District - Purchasing & Warehouse Services 925-485-5245 925-485-5271

Contract #: B20/21-13

Chabot College in Hayward, has limited cellular coverage and signal strength within its buildings. During the Measure B construction and modernization of several buildings on campus, high efficiency, IR reflecting, low-emission glass was installed. Cellular signal inside of these and many other buildings is virtually non-existent.

The poor cellular service inside of buildings has presented a safety and security issue for students, faculty and staff. While the building exterior coverage is the responsibility of the carrier macronetwork, CLPCCD will be installing a commercial Distributed Antennae System (DAS) for the transmission of the cellular signal bands from 600-2700 MHz into its buildings. This DAS system will support multiple cellular service providers including AT&T, Verizon and T-Mobile. The DAS will be designed in a multi-sector topology for effective 911 identification.

PLEASE NOTE: All Sealed Bid Proposals shall be submitted on forms furnished by the District. Bid Proposals must conform with, and be responsive to, the Bid and Contract Documents, copies of which will only be distributed to the pre-approved vendors. Only Bid Proposals submitted to the District at or prior to Friday May 14, 2021 at 2:00 p.m. shall be considered for the public opening and reading of Bid Proposals.

Contact for Questions: Michael McClung at mmclung@clpccd.org

RFP - ROADWAY DESIGN SERVICES TO THE SAN LORENZO VALLEY WATER DISTRICT

Addenda: 0

4/6/21 3:00 PM 21-00836 Boulder Creek

Public Works

Plan Issuer: San Lorenzo Valley Water District jwolff@slvwd.com

831-430-4635

The 2021 Lyon Complex Access Road Project (Project) includes a geotechnical investigation of the hillside area between Big Steel tank and the Lyon tank complex, situated on Madrone Drive in Boulder Creek, California; design of a new road intended to provide access from Madrone Drive to the Lyon tank complex; and construction of said road.

The District's intent is to award a contract to an engineering firm qualified to perform roadway design and layout, with necessary geotechnical investigation; then contract separately for roadway construction.

UTILITY UNDERGROUND DISTRICT 38 SERVICE LATERALS PROJECT

Addenda: 7

4/7/21 3:00 PM 21-00680 Alameda

Public Works

Plan Issuer: Alameda Municipal Power

510-814-6429 000-000-0000

Prebid Conf: 3/17 @ 10 AM. RSVP in advance for the project in the Bid Portal and you will receive an email containing information about joining the meeting prior to the pre-bid conference to acquaint all prospective bidders with the Contract Documents and the Project.

Contract #: CS 03-21-01

The Project is located in the City of Alameda. along Otis Drive between Broadway and High Street and along Broadway between Otis Drive and Encinal Avenue, including. Evelyn Court, Waterton Street, Fountain Streets, and parts of Pearl Street, Mound Street, and Court Street, and is described as follows:

This project will involve installing electric and telecommunication service lateral trench and conduit from back-of-the sidewalk to a designated utility location on private property in preparation of overhead to underground conversion. The Contractor is to provide all material, labor, and equipment required to provide trenching, saw cutting, sidewalk and street removal and replacement, boring, and installation of underground substructures for Alameda Municipal Power (AMP), AT&T, and Comcast. AMP is the lead utility responsible for managing this joint service trench project. There are 193 site locations to install the joint service lateral trench and conduit for all three utilities. The Technical Specifications contain the full description of the Work.

NEW TRIP HAZARD REMOVAL OF RAISED SIDEWALK - DISTRICT 1, 7, 8 AND 10

Addenda: 0

4/7/21 3:30 PM 21-00973 Hayward

Public Works

Plan Issuer: City of Hayward - Purchasing

510-583-4000 510-583-3600

Contract #: 2113-030921

The work to be done consists of inspecting Districts 1, 7, 8 and 10 of the City of Hayward to identify tripping hazards caused by concrete sidewalk offsets between the heights of 1/2 inch to 1-1/2 inches, and removing the tripping hazards by grinding or saw cutting of the concrete sidewalk panel offsets, and doing all appurtenant work in place and ready for use. Each concrete sidewalk offset shall be tapered to an accurate 1:12 slope and shall have a smooth unifor appearance and texture.

RFQ: MB GENENTECH HALL UNINTERRUPTED POWER SUPPLY (UPS) UPGRADE (ENGINEERING FIRMS) - UCSF

Addenda: 0

4/8/21 12:00 PM 21-00854 San Francisco

Hospital

Plan Issuer: UCSF - Tra Thanh tra.thanh@ucsf.edu

415-476-9437

UCSF Real Estate Campus Design & Construction is requesting written responses to this Qualification Packet from qualified firms to provide professional services for the MISSION BAY GENENTECH HALL UNINTERRUPTED POWER SUPPLY (UPS) UPGRADE (PRJ-000296) project. The successful firm will work with UCSF to provide provide technical specialists including, but not limited to, the professional disciplines of electrical engineering, structural engineering, and architectural services.

The main scope of this Project is to upgrade the Uninterrupted Power Supply (UPS) that services IDF Riser A, Riser B, Net Work Distribution Center (NDC) and Data Center at Mission Bay Genentech Hall. It is UCSF's best interest to upgrade the system with two UPSs. The first new UPS is to serve IDF Riser A and Data Center. Which is ultimately replace an existing UPS that serves Data Center only. The second new UPS is to serve IDF Riser B and NDC. An interconnection between the two new IDF riser UPSs will allow for redundant backup through a manual transfer switch.

DUAL TANKS, DIESEL FIRED THERMOPLASTIC PRE-MELTER AND TRAILER

Addenda: 0

4/8/21 2:00 PM 21-00828 Antioch **Public Works**

Plan Issuer: City of Antioch - Public Works Department 925-779-7050 925-779-7062

Contract #: 020-0408-21A

Dual tank 1500lb ea. Tank capacity trailer mounted thermoplastic pre-Melting system with a minimum GVWR rating of 14,000 lbs. A 1200 lb. minimum capacity, hydraulic lift gate will be installed at the front drive side of the trailer. This unit shall conform to all standards for thermoplastic equipment, including but not limited to precise digital temperature control of material with over-temperature safety circuit and continuous agitation. The system shall be equipped with a heavy duty manually controlled knife valve that provides positive shutoff of the thermoplastic material when filling the applicator. Unit shall be delivered ready for use with the addition of thermoplastic material and fuel. All materials, design and workmanship will be in accordance with the most current and best procedures in the industry. All furnished equipment shall be new and of the latest design model. For any offer to be considered, all items must be of a standard production model, not modified for bid purposes.

Hospital

Plan Issuer: UCSF - Alison Kang alison.kang@ucsf.edu

415-353-7393

000-000-0000

Contract #: 19-204

The Ambulatory Care Center (ACC) 3rd and 4th Floor Hematology and Bone Marrow Transplant expansion project is a three-phase project that will expand the capacity of the existing clinical services provided on the 4th floor into the Eastern half of the 3rd floor. The Project is a remodel of approximately 14,800 square feet. Hazardous material abatement is required on the 3rd floor. Work includes new interior partitions, ceilings, finishes, casework, new plumbing, mechanical, electrical, lighting, and low voltage systems to tie into the existing building.

The 3rd floor clinic is a complete remodel and will include reception and waiting, exam rooms, consult rooms, additional patient toilets, provider touchdown stations, administrative offices and conference rooms, and a staff/break room. Additional 3rd floor work includes interior refresh of existing elevator lobby and corridor, remodel of existing staff and public toilets located in the core and upgraded accessible drinking fountain.

The 4th floor treatment area remodel will expand the existing cancer infusion center: an additional infusion bay, additional pheresis rooms, consult/infusion room, blood draw, central line draw room, (2) additional nurse stations, clean utility room, and soiled utility room.

SANITARY SEWER MAIN REPLACEMENT AT ALAMEDA COUNTY TRANSIT MAINTENANCE FACILITY

Addenda: 1

4/13/21 2:00 PM 21-00840 Hayward \$815,000 Public Works

Plan Issuer: City of Hayward - Engineering 510-583-4730 510-583-3620
 Prebid Conf: 4/1 @ 9 AM at 1842 Sabre Street, Hayward Contract #: 07781
 The work includes, in general, the furnishing of labor, materials, and equipment for the construction of a 12" sanitary sewer main replacement project, including, but not limited to removing and replacing approximately 660 feet of existing asbestos cement sewer pipe with new sanitary sewer pipes by open cut; restoring and reconnecting all affected sanitary sewer service lines (laterals); modifying existing manholes; and replacing approximately 11,825 square feet of concrete.

The work also includes cleaning and video inspection of sanitary sewer pipes, wastewater flow control and bypass pumping, dewatering, shoring, traffic control, utility locating, potholing, public notification, restoration of public and private surface improvements (including but not limited to pavement, sidewalk, curb and gutter, fences, and landscaping), and all incidental items not mentioned above, but are required by the Contract Drawings, Standard Specifications, Technical Specifications, or these Special Provisions.

1. Selective Demolition, and Hazardous Material Abatement.
2. Construction phasing and barricading of work areas as required to separate construction areas from occupied spaces and as needed to accommodate the Owner's schedule and use of the site.
3. All other work as shown in the Contract Documents.

CASTENADA NO. 1 AND NO. 2 RESERVOIRS REHABILITATION, GLEN RESERVOIR DEMOLITION, AND MULHOLLAND RESERVOIRS ROOF MAINTENANCE - EBMUD

Addenda: 8

4/14/21 1:30 PM 21-00713 San Ramon, Lafayette & Orinda \$15,000,000 to \$18,000,000 **Public Works**

Plan Issuer: EBMUD-East Bay Municipal Utilities District 510-287-1040

Prebid Conf: 3/16 @ 9 AM & 3/18 @ 9 AM (See Notice to Contractors for meeting site location) Contract #: 2169

Work includes the rehabilitation of Castenada No. 1 and No. 2 steel reservoirs, the demolition of the Glen redwood reservoir, and roof improvements for Mulholland No. 1 and No.2 steel reservoirs. The Work includes demolition and removal of a redwood tank, steel reservoir roofs, and valve vaults; raising the height of steel tank walls; construction of aluminum dome roofs; repair of existing aluminum dome roofs; construction of valve vaults; abrasive blasting, priming, and coating of tank interiors and exteriors; and constructing civil, structural, mechanical, electrical, and pipeline improvements at the facilities. The reservoirs are located in San Ramon, Lafayette, and Orinda, respectively, in Contra Costa County, California.

PLEASE NOTE: The District will conduct two pre-bid jobsite inspection tours to familiarize prospective bidders with the project site and conditions. The inspections will be conducted on Tuesday, March 16, 2021 at 9 AM, and Thursday, March 18, 2021 at 9 AM. Attendees shall assemble at the Castenada Reservoirs site located at 5050 Crow Canyon Road, San Ramon. During the inspection tour, Attendees will also travel to Glen Reservoir located at the end of Monticello Road, Lafayette, and the Mulholland Reservoirs site located on Donald Dr, Orinda. This is the only time that the facilities will be open for inspection. The interior of the existing reservoirs will not be open for inspection. Each inspection will last approximately 1 hour. No photography by the Attendees will be allowed.

RFQ/P ON-CALL POTHOLE AND MISCELLANEOUS PAVEMENT REPAIRS - CITY OF SAN RAMON

Addenda: 0

4/14/21 2:00 PM 21-00928 San Ramon

Public Works

Plan Issuer: City of San Ramon - Engineering

925-973-2670

000-000-0000

The Project involves construction and repair work for public infrastructure, which may be located at various streets, trails, parks and other facilities located throughout the City. The Work is to be performed on an on-call and as-needed basis, based on Work Orders issued by the City, as further specified in the Contract Documents.

Project scope includes, but is not limited to, any or all of the following:

- Removing and replacing existing pavement failed areas;
- Placement of pavement reinforcement fabric;
- Adjustment of storm drain manholes to grade;
- Hot mix asphalt leveling course to fill depressed areas;
- Slurry Seal Type II applied to streets, trails, and/or parking lots;
- Miscellaneous pavement work as directed;
- Notification of property owners;
- Installation of traffic control systems necessary to complete work on collector, arterial, and residential streets; and
- Other incidental and necessary work for performance of the above in conformance with the City of San Ramon Standard Details, the 2018 Caltrans Standard Specifications, and specified provisions of the 2018 Caltrans Standard Plans, all of which are incorporated by reference herein.

JOB ORDER CONTRACT 21-048 FOR FACILITIES - MINOR CAPITAL OUTLAY PROJECTS

Addenda: 3

4/14/21	3:00 PM	21-00772	San Luis Obispo			School
Plan Issuer: Cal Poly Facilities Planning & Capital Projects					805-756-1299	805-756-7566
Prebid Conf: 3/17 @ 10am- ZOOM					Contract #: 21-048	

The Job Order Contract (JOC) is a competitively bid, firm fixed-priced, indefinite quantity contract. The scope of work includes a collection of detailed repair and construction tasks and specifications that have established unit prices. Contractors are bidding on a mark-up, not on a project cost.

The University intends to award two separate JOC agreements under two separate solicitations at the same time, to the lowest responsive and responsible bidder for each solicitation for the accomplishment of repair, alteration, modernization, rehabilitation, demolition and minor construction of infrastructure, buildings, structures, or other public works. Bidders may bid separately on any or all of the contracts; however, only one contract may be awarded to any bidder. The apparent lowest responsive and responsible bidder shall be determined sequentially for each contract in the following order: JOC 21-048; JOC 21-049. The apparent lowest responsive and responsible bidder on each JOC contract will be excluded from consideration for successive contracts. JOC 21-048 and JOC 21-049 will have a minimum value of \$25,000 and a maximum value of \$500,000; The University reserves the right to increase the maximum value of JOC 21-048 and JOC 21-049 incrementally up to \$3,000,000 dependent upon contractor's performance, available prequalification rating minus receivables, and bonding capacity. The term of each JOC contract is 365 calendar days.

LEVINE-FRICKE SOFTBALL FIELD REPLACEMENT - SP 06.2 - ROUGH CARPENTRY BID PACKAGE Addenda: 1

4/15/21 2:00 PM 21-00923 Berkeley \$525,000 **School**

Plan Issuer: UC Berkeley - Capital Projects 510-642-6273 000-000-0000

Prebid Conf: MAND Virtual Pre-Bid Job Walk: 3/31 @ 10 AM Contract #: 12650A

1. As a subcontractor to Plant Construction Company (CM@Risk General Contractor), this trade package is responsible for the following related specification sections:
 - a. 06 10 53 - Miscellaneous Rough Carpentry
 - b. 06 20 23 - Interior Finish Carpentry
 - c. 06 40 00 - Architectural Woodwork
 - c. 06 64 00 - Plastic Paneling
 - d. 09 21 00 - Gypsum Board Assemblies
2. Provide fire treated plywood backboards for MPOE, Tele/Data closets, electrical rooms, elevator rooms and all locations where a low or line voltage electrical panel will be installed
3. Provide wood blocking and backing where required for all wall mounted fixtures, monitors, equipment, lockers, millwork, finish carpentry and MEPS items.
4. Provide wood nailers, door bucks, and blocking for installation of wood door frames.
5. Provide all wood framed curbs, nailers, blocking and cant strips where required at access panels, dugouts, locker rooms, bathrooms, ventilator curbs, louvers, new roofing areas, and other exterior details.
6. Provide ramps, barricades and any other requirements to maintain pedestrian access path to Strawberry pool west entry gate.
7. Provide and install all appliances.
8. Include installation of all OFCI items.
9. Include installation of all FRP wall protection including trim.
10. Provide temporary bracing of site elements such as light poles, fencing, etc., until permanent installation is established, and include removal and disposal of this bracing.
11. Include temporary protection of stairs, walls, floors, and finishes as they are installed to prevent damage until they are completed, and include regular maintenance of this protection and removal and disposal upon completion.
12. Provide temporary weather protection throughout the construction period.
13. Provide tree protection at trees to remain.
14. Include installing 4x4 wood poles for temp power, lighting and water during the entire course of construction, and include removal and disposal of these items. Poles should surround the site. See logistics plan for reference.
15. Include installation, relocating, maintenance, and removal of temporary structures per the site logistics plan, and for all pedestrian tunnels and walkways required during construction.
16. Include erecting story poles and setting exterior grading benchmarks with the surveying team.
17. Include layout and interior benchmarks to facilitate the MEPS rough in, and reestablishing benchmarks as needed during the course of construction as the work progresses.
18. Include evaluation reports for:
 - a. Fire retardant treated wood
 - b. Power driven fasteners
 - c. Expansion anchors
19. Include daily cleanup of all materials and debris during the course of construction and disinfecting all tools at the end of each day.
20. Include temporary shoring for metal deck pours.

Plan Issuer: UCSF - Lisa Trogdon lisa.trogdon@ucsf.edu 415-502-4268 000-000-0000

Contract #: C863685

The scope of the Project is to replace the existing mechanical cooling system at the facility. Building centrifugal chillers, cooling towers, and associated pumps and appurtenances will be replaced as part of this project. The building is served by (x2) existing 325-ton chillers, and (x2) existing 325-ton cooling towers with (x3) circulation pumps for both the chilled water and condenser water loops. The Project will remove the existing chillers, cooling towers and pumps and replace them with (x2) 250-ton chillers, and (x2) 325-ton cooling towers. (x2) circulation pumps and appurtenances will be provided for both the condenser and chilled water loops within the building and installing an economizer bypass heat exchanger to the system. With the exception of the cooling towers, all equipment will be located in the basement and shall tie into local piping distribution connections in the building. The new equipment are to be integrated to the facility's existing Distech Control System. 100% CDs and Specifications will be available at time of bidding.

The Prequalification Questionnaire will be submitted via BuildingConnected. To request an Invitation to the Prequalification, go to UCSF BuildingConnected Plan Room at: <https://app.buildingconnected.com/public/55b2899376365309004aefcc>, join the "Bid Opportunity" and change your status to bidding.

NEW TRASH CAPTURE DESIGN AND INSTALLATION Addenda: 1

4/16/21 3:00 PM 21-00974 Hayward **Public Works**

PREQUAL: STRUCTURAL STEEL, DRYWALL & CEILINGS, EXTERIOR GLAZING, EXTERIOR CLADDING (GFRC), CIP CONCRETE, REBAR, LAB CASEWORK, DOORS FRAMES & HARDWARE, SITE UTILITIES SUBCONTRACTOR DESIGN BUILD QUALIFICATIONS - SFUSU Addenda: 0

4/20/21 1:00 PM 21-00697 San Francisco Public Works

Plan Issuer: DPR Construction joannam@dpr.com 650-868-8691 000-000-0000

Prebid Conf: MAND 3/18 @ 8 AM (Contact Joanna Martinez at: joanna@dpr.com, or call 650-868-8691 for meeting participation instructions) Contract #: E001017-2

SCOPE OF SERVICES: Notification of Qualification Process for Qualified Design Build Subcontractors Requested by DPR Construction. DPR Construction invites trade contractors to qualify by submitting qualifications for this Project.

GENERAL DESCRIPTION OF WORK:

The new Science Replacement Building is envisioned as a modern, collaborative facility that supports the instructional and teaching-related research needs of the College of Science & Engineering (CoSE). It will provide lower division and upper division teaching labs, undergraduate and graduate research labs, large, flat-floor flexible interdisciplinary lecture classroom, makerspace for prototyping and student projects, tutoring and student advising space, and social space that allows for informal collaboration and learning. It will also include faculty shared workstations, conference rooms, laboratory support space, and a new office suite for the CoSE Dean.

The Project covers demolishing portions of an existing structure and adding an additional 126,000 GSF on the site. 54,000 GSF of the 1950's/1960's Building will be renovated. The Project is located on the eastern edge of the SF State campus, between Hensill Hall to the north and the HSS Building to the south. Three wings on the east side of the existing building were built in the 1960s, and three wings on the west side were built during the 1950s. The 1960s portion of the existing building will be demolished to make room for a new building that must be less than 75 feet above ground. Approximately 30% of the western wings were renovated in 2015. The remaining areas in the western wings will be renovated as part of this Project. The Project is expected to achieve a minimum of LEED Gold. The address is 1600 Holloway Ave, San Francisco, facing 19th Avenue to the east and the central Quad to the west. The Project site has high visibility along the campus's two most public faces. The site is located at the very heart of the SF State campus. It is immediately adjacent to Hensill and Thornton Halls, both of which house other CoSE programs.

The Subcontractor designated categories include:

- Structural Steel (DA)
- Drywall (Interior and Exterior) & Ceilings (DB)
- Exterior Glazing (DB)
- Exterior Cladding - GFRC & Metal Panel (DA)
- Cast-In-Place Concrete and Reinforcing Steel (DA)
- Lab Casework (DA)
- Doors Frames and Hardware (DA)
- Site Utilities

Contact DPR via email at: joanna@dpr.com to receive Prequalification Instructions. Other Details: This Project is a public works project and is subject to prevailing wage rate laws. All Respondents/Proposers and all tiers of subcontractors who will work on this Project shall register to bid and work on public works projects with the Dept. of Industrial Relations (DIR), and maintain current this registration per Labor Code section 1725.5. For more information, go to <http://www.dir.ca.gov/Public-Works/PublicWorks.html>

DOMESTIC WATER BOOSTER SYSTEM PROJECT AT LAS POSITAS COLLEGE (REBID)

Addenda: 3

4/20/21 2:00 PM 21-00863 Livermore

\$450,000

School

Plan Issuer: Chabot-Las Positas Community College District - Purchasing & Warehouse Services

925-485-5245

925-485-5271

Prebid Conf: MAND 3/29 and 4/7 @ 10 AM at Las Positas College, 3000 Campus Hill Drive, Facilities Management Office Trailer, Conference Room 1, adjacent to Building 1300, Livermore

Contract #: B20/21-07

The scope of the project includes providing a booster pump system to raise the campus domestic water pressure. Pressure reducing valves will be installed at selected buildings to prevent overpressure of plumbing fixtures. As an alternate, the contractor shall install an AquaShield enclosure (or approved equivalent product) around the booster pump station. The enclosure shall have a mill grade marine aluminum or stainless steel finish. The enclosure must also be fitted with a removable top and access doors on its front, side and rear.

GRAHAM HILL WATER TREATMENT PLANT ENTRANCE IMPROVEMENTS

Addenda: 0

4/22/21 2:00 PM 21-00941 Santa Cruz \$250,000 to \$285,000 **Public Works**
 Plan Issuer: City of Santa Cruz 831-420-5327 831-420-5201
 Prebid Conf: MAND 4/6 @ 10am- site Contract #: CWO 2021-003
 The City of Santa Cruz is pleased to issue the Graham Hill Water Treatment Plant (GHWTP) Entrance Improvements Project for bidding. Bid documents will be provided to interested contractors by separate link after returning a completed non-disclosure agreement to the contact listed on the advertisement for bids.
 The City of Santa Cruz Water Department is a public agency with the responsibility to provide safe drinking water to its customers. The GHWTP is the City's only surface water treatment facility and a critical component of the City's permitted drinking water system. The work involves expanding the existing roadway entrance to the GHWTP into a two-lane road, demolish the existing gate and replace it with two separate gates, relocate existing access control system and cameras, relocate existing personnel gate and mailbox, install traffic signs, install engineered gravel strips on the north and south side of the entrance roadway.

NEW RFQ HOMELESS ENCAMPMENT ABATEMENT SERVICES - CITY OF PLEASANTON

Addenda: 0

4/22/21 3:00 PM 21-00978 Pleasanton

Public Works

Plan Issuer: City of Pleasanton - Engineering

925-931-5650 000-000-0000

The City of Pleasanton is seeking a qualified entity to provide homeless encampment abatement. Such services may include but are not limited to providing clean-up, transportation, and disposal of bio-hazardous and non-hazardous waste and other services as necessary, e.g, providing legal notice prior to cleanup as well as transportation of nonwaste items to the City's facility in Pleasanton (so that items may be stored, claimed, and collected by residents experiencing homelessness). Contractor shall provide all labor and expertise related to noticing, surveying, documenting, cleaning up, collecting or removing items, transporting personal items to storage, and disposing of garbage and hazardous items involving homeless encampment abatement actions on City property under an "as needed agreement." It is anticipated that the City will have approximately 10-12 clean-ups annually.

NEW RFP FOR CONTROL SYSTEMS INTEGRATION SERVICES FOR CAPITAL IMPROVEMENT PROJECTS - CONTRA COSTA WATER DISTRICT

Addenda: 0

4/23/21 3:00 PM 21-00963 Concord & Oakley **Public Works**
 Plan Issuer: Contra Costa Water District-CCWD 925-688-8300 000-000-0000
 Contract #: 2227

The District's facilities are monitored and controlled by three independent control systems; one controlling the distribution side and two controlling the Water Treatment Plants.

The distribution side consists of Supervisory Control and Data acquisition (SCADA) system, Remote Telemetry Units (RTUs) based on Schneider Electric PLSs, and radio communication system connecting all field RTUs to the SCADA system.

The control system at the two Water Treatment Plants (Randall-Bold and Bollman WTP), each consists of a PLC based system made by Schnider Electric and a Human Machine Interface (HMI) system based on Wonderware.

NEW EMERGENCY OUTFALL IMPROVEMENTS PROJECT

Addenda: 0

4/27/21 11:00 AM 21-00984 Union City

\$1,200,000

Public Works

Plan Issuer: Union Sanitary District
 Prebid Conf: 4/6 @ 9 AM via Zoom

510-477-7500 510-477-7509
 Contract #: 800-494

The project is located at the northwest corner of the Alvarado Wastewater Treatment Plant near the south end of Veasy Street in Union City, CA and consists, in general, of the following work:

- Demolition and disposal of approximately 40 linear feet of 48-inch diameter pipeline.
- Replacement of approximately 20 linear feet of 48-inch diameter reinforced concrete pipe, RCP with centrifugally cast, fiberglass-reinforced, polymer mortar pipe, CCFRPM by open cut.
- Rehabilitation of approximately 61 linear feet of 48-inch diameter RCP by slip-lining.
- Construction of approximately 93 linear feet of 48-inch diameter CCFRPM by open cut.
- Construction of a concrete outlet structure consisting of a slab, headwalls, and wing walls.
- Placement of approximately 90 cubic yards of stone riprap for bank and channel protection.
- Removal and disposal of approximately 250 cubic yards of sediment to facilitate placement of the rip rap.
- Installation and removal of a temporary sheet pile cofferdam.
- Construction of an access vault and blow-off piping system on the existing outfall pipeline.
- Construction of a new riser pipe and cap on the new redundant pipeline.
- Dewatering of project excavations.
- Site restoration including final grading, paving, planting, and fencing.
- Survey of newly constructed facilities.
- Implementation of all mitigation measures in the Project's Mitigated Negative Declaration and Mitigation Monitoring and Reporting Plan.
- Bypass Contingency Allowance

Other work associated with the contract shall include, but not be limited to, mobilization / demobilization, clearing and grubbing, shoring and bracing of excavations, traffic control, erosion and sediment control, pipeline cleaning, debris removal and disposal, pre and post-rehabilitation closed circuit TV, CCTV inspection, and other items or details that are required by the Contract Documents.

PLEASE NOTE: All bidders submitting a bid must purchase a paper copy of the Project Manual from the District prior to the bid opening date.

RFP FOR ODOR AND CORROSION CONTROL SERVICES

Addenda: 0

4/28/21 2:00 PM 21-00892 Santa Cruz

Public Works

Plan Issuer: County of Santa Cruz

831-454-2160

831-454-2385

Prebid Conf: MAND 4/6 @ 9am- 2750 Lode Street, Santa Cruz

The Santa Cruz County Sanitation District (District) invites sealed proposals for Odor and Corrosion Control Services from fully licensed, insured, bonded, certified CONTRACTORS to furnish all labor, tools, equipment, and incidentals required to provide services for the Santa Cruz County Sanitation District.

The District maintains 220 miles of gravity sewer mains, 14 miles of force mains, and 4,687 sewer manholes and 35 pump stations. The District encompasses the communities of Live Oak, portions of Aptos and Soquel and the City of Capitola. Our primary purpose is to maintain the sewer system transporting the wastewater to the City of Santa Cruz Wastewater Treatment Plant. The D.A. Porath Facility is the District's main facility and the average daily dry weather flows are approximately 3 million gallons per day before it is pumped to the City's treatment.

The District is soliciting bid proposals from qualified and experienced contractors to provide odor and corrosion control chemical, carbon media and services as detailed in this Specification.

The scope of this project shall include, but not be limited to:

- Provision of and delivery of chemical
- Provision of carbon and carbon change-out services
- Data collection
- Data Analysis
- Provision and installation of equipment and instrumentation
- Routine service and maintenance
- Remote Feed Adjustment Capability
- Remote H2S Monitoring
- Remote Tank Monitoring and Inventory Control Services
- Reporting

The term of this contract will be 2 (two) years with the option to extend for an additional 2 (two) one-year periods.

L TARAVAL IMPROVEMENT PROJECT SUNSET BOULEVARD TO WEST PORTAL - SFMTA

Addenda: 13

5/1/21 3:00 PM 21-00161 San Francisco \$90,000,000 Public Works

Plan Issuer: City & Co of San Francisco (SFMTA) allan.andaya@sfmta.com 415-701-4666 000-000-0000

Prebid Conf: 2/4 @ 10 AM (via Zoom. See Invitation for Bid for meeting participation details) Contract #: 1308R

The work under this Contract is to construct capital improvements along the L Taraval corridor between Sunset Boulevard and West Portal. The Work, as detailed in the Plans and Specifications, consists generally of the following:

01. Perform selective demolition of existing facilities.
02. Replace existing tangent paved embedded tie and ballast tracks along the L Taraval Line from Sunset Boulevard and Taraval Street to Forest Side Avenue and Ulloa Street with new direct fixation track and fastening systems, using 115# RE rails.
03. Replace existing track pavement with track concrete pavement within the track right-of-way.
04. Reconstruct Overhead Contact System (OCS), including poles and pole foundations, special work, trolley wires, tangent and feeder spans, insulators and various OCS components.
05. Renovate and reconstruct roadway pavement, parking strips and gutters, located between the sidewalk and the reconstructed trackway as well as at intersections.
06. Overlay the entire roadway with a 2-inch thick layer of asphalt concrete wearing surface from Sunset Boulevard to Forest Side Avenue along project alignment, except at trackway and the parking strips and gutters.
07. Construct temporary boarding platforms, as necessary.
08. Construct new boarding islands and high level accessible platforms and reconstruct or modify existing boarding islands and platforms.
09. Coordinate installation of bus shelters with electrical power feed for Next Bus signage on the boarding islands.
10. Construct and install architectural elements and components such as railings, trash receptacles, and bike racks.
11. Construct sidewalk bulb-outs and curb ramps.
12. Furnish and install and establish landscape planting.
13. Tree removal & stump grinding.
14. Install custom thermoplastic crosswalks.
15. Furnish and install new roadway lighting poles, fixtures and bracket arms, and relocate existing fixtures to new poles or combination trolley/streetlight poles.
16. Furnish and install new streetlight conduit, pull boxes, and underground and overhead service connections for streetlights.
17. Provide new traction power feeder cable grounding of new trolley poles.
18. Provide new traction power riser cables and multi-tap connectors for new trolley poles.
19. Provide new traction power feeder cables for existing sectionalizing switch and for feeder circuit WP-13.
20. Replace feeders in substation with new FBK type H breakers for feeder circuits T-1, T-2, and WP-13.
21. Add electrical current telemetry devices to feeder circuits T-1, T-2, and WP-13.
22. Upgrade Remote Terminal Unit (RTU) and annunciator units at Taraval and West Portal substations.
23. Upgrade Traction Power SCADA system at Taraval and West Portal substations and Power Control Center (PCC).
24. Provide new VTAG train signaling system at select locations.
25. Replace five (5) all way stop intersections with traffic signals and install intersection controller (IC) at each intersection.
26. Replace existing traffic signals.
27. Provide rapid rectangular flashing beacons.
28. Construct traffic signal conduit and pull boxes for future signalization and future interconnect fiber optic.
29. The Sewer Work to be performed includes but is not limited to constructing 12 to 30-inch diameter vitrified clay pipes and reinforced concrete pipes, cured-in-place lining 2'x3' and 2'-6"x3'-9" flat top concrete sewers, constructing new manholes, replacing side sewers, cured-in-place lining of existing side sewers, reconstructing culverts, mortaring manholes, plugging & filling existing sewer systems, performing post video inspections, and all other related work.
30. The work to be performed under this contract includes installing : approximately 20,000 linear feet of 4-, 6- and 8-inch ductile iron pipe; approximately 1,000 linear feet of 4-, 6- and 8- inch restrained joint ductile iron pipe; approximately 1,300 linear feet of 12-inch restrained joint ductile iron pipe; approximately 200 linear feet of 16-inch restrained joint ductile iron pipe; ductile iron joint fittings and valve assemblies; corrosion mitigation system; 1-inch to 8-inch service piping; pipe abandonment; open trench installation of nine (9) steel casings with ductile iron carrier pipe (restrained joint type) at Muni track crossings; and open trench installation of one (1) steel casing near 28th Avenue.
31. Replace all low pressure fire hydrants and add new fire low pressure hydrants and associated fittings and valves.
32. Provide all excavation and shoring at all connections, disconnections, and at service pits, where the work will be performed by SFWD.
33. Provide all excavation and excavation support work for PG&E hot tapping of deactivated gas mains.
34. Provide traffic control and support for all work.

(This Project is a REBID. Previously scheduled bid date was 9/12/19).

NEW NCPA-CT1 SUBSTATION 115KV SF6 BREAKER REPLACEMENT PROJECT

Addenda: 0

5/5/21 3:00 PM 21-01006 Alameda

Public Works

Plan Issuer: Alameda Municipal Power 510-814-6429 000-000-0000
 Prebid Conf: MAND 4/14 @ 10 AM at 2900 Main Street, Alameda Contract #: CS 01-21-02

Alameda Municipal Power (AMP) is the City of Alameda's not-for-profit electric municipal utility, serving residents and businesses for over 130 years. Its reliable electric supply system covers 23 square miles and provides power to more than 34,000 customers. AMP has two main substations namely Cartwright and Jenney Substations. AMP also maintains and operates certain electric facilities at Northern California Power Agency Combustion Turbine Project Number One Substation (NCPA-CT1). NCPA-CT1 substation is shared by NCPA and AMP for the former to interconnect the Combustion Turbine generator units and for AMP to distribute power to customers within the City of Alameda. AMP's 115-kV transmission system is fed from two separate radially connected lines coming from Pacific Gas Electric's (PG&E) Substations C and J, both located in Oakland, California.

The existing Westinghouse 121DWE40-2000A Sulfur Hexafluoride (SF6) insulated high voltage dead tank circuit breakers (CBs) CB212 and CB222 at NCPA-CT1 Substation served as the incoming main feeds from 115kV transmission lines connected to PG&E Station C and AMP Cartwright Substation. These SF6 CBs have been in service for over 35 years and have exceeded its service life. This project involves replacing two (2) SF6 CB with two (2) new Siemens Motor Spring Operating Mechanism SF6 CBs. CB tanks, motor operator/terminal cabinets, new CB structural steel support lattice pieces, and their associated parts have already been delivered and are currently stored at AMP Warehouse located at 1835 Oak Street.

PREQUALIFICATION WIDENING OF US 101 SB TO SR 87 SB CONNECTOR & US 101 SB ON-RAMP FROM STORY ROAD - SCVTA

Addenda: 3

SCOL70 5/5/21 5:00 PM 21-00241 Santa Clara County

\$2,900,000 to \$3,500,000

Public Works

Plan Issuer: SCVTA -Santa Clara Valley Transportation Authority

408-321-7189

Contract #: C19240

At Location 1, the Project will widen the existing connector ramp to provide two standard 12-foot mixed flow lanes with standard inside and outside shoulders. The improvements involve restriping, pavement widening, reconstructing a lined trapezoidal ditch, and installing a new Traffic Monitoring System (TMS).

At Location 2, the Project will widen the existing diagonal on-ramp to add a standard 12-foot High Occupancy Vehicle (HOV) lane. The Project will also re stripe the adjacent Collector-Distributor (C-D) to Southbound US-101 to provide a standard 12-foot HOV lane. The improvements involve restriping, pavement widening, extending a reinforced concrete box culvert, and installing new ramp metering systems.
