**PREQUAL: STRUCTURAL STEEL, DRYWALL & CEILINGS, EXTERIOR GLAZING, EXTERIOR CLADDING (GFRC), CIP CONCRETE, REBAR, LAB CASEWORK, DOORS FRAMES & HARDWARE, SITE UTILITIES SUBCONTRACTOR DESIGN BUILD QUALIFICATIONS - SFUSU** Addenda: 0

**4/20/21 1:00 PM 21-00697 San Francisco Public Works**

Plan Issuer: DPR Construction joannam@dpr.com 650-868-8691 000-000-0000

Prebid Conf: MAND 3/18 @ 8 AM (Contact Joanna Martinez at: joanna@dpr.com, or call 650-868-8691 for meeting participation instructions) Contract #: E001017-2

SCOPE OF SERVICES: Notification of Qualification Process for Qualified Design Build Subcontractors Requested by DPR Construction. DPR Construction invites trade contractors to qualify by submitting qualifications for this Project.

**GENERAL DESCRIPTION OF WORK:**

The new Science Replacement Building is envisioned as a modern, collaborative facility that supports the instructional and teaching-related research needs of the College of Science & Engineering (CoSE). It will provide lower division and upper division teaching labs, undergraduate and graduate research labs, large, flat-floor flexible interdisciplinary lecture classroom, makerspace for prototyping and student projects, tutoring and student advising space, and social space that allows for informal collaboration and learning. It will also include faculty shared workstations, conference rooms, laboratory support space, and a new office suite for the CoSE Dean.

The Project covers demolishing portions of an existing structure and adding an additional 126,000 GSF on the site. 54,000 GSF of the 1950's/1960's Building will be renovated. The Project is located on the eastern edge of the SF State campus, between Hensill Hall to the north and the HSS Building to the south. Three wings on the east side of the existing building were built in the 1960s, and three wings on the west side were built during the 1950s. The 1960s portion of the existing building will be demolished to make room for a new building that must be less than 75 feet above ground. Approximately 30% of the western wings were renovated in 2015. The remaining areas in the western wings will be renovated as part of this Project. The Project is expected to achieve a minimum of LEED Gold. The address is 1600 Holloway Ave, San Francisco, facing 19th Avenue to the east and the central Quad to the west. The Project site has high visibility along the campus's two most public faces. The site is located at the very heart of the SF State campus. It is immediately adjacent to Hensill and Thornton Halls, both of which house other CoSE programs.

The Subcontractor designated categories include:

- Structural Steel (DA)
- Drywall (Interior and Exterior) & Ceilings (DB)
- Exterior Glazing (DB)
- Exterior Cladding - GFRC & Metal Panel (DA)
- Cast-In-Place Concrete and Reinforcing Steel (DA)
- Lab Casework (DA)
- Doors Frames and Hardware (DA)
- Site Utilities

Contact DPR via email at: joanna@dpr.com to receive Prequalification Instructions. Other Details: This Project is a public works project and is subject to prevailing wage rate laws. All Respondents/Proposers and all tiers of subcontractors who will work on this Project shall register to bid and work on public works projects with the Dept. of Industrial Relations (DIR), and maintain current this registration per Labor Code section 1725.5. For more information, go to <http://www.dir.ca.gov/Public-Works/PublicWorks.html>

Plan Issuer: Chabot-Las Positas Community College District - Purchasing & Warehouse Services 925-485-5245 925-485-5271

Prebid Conf: MAND 3/29 and 4/7 @ 10 AM at Las Positas College, 3000 Campus Hill Drive, Contract #: B20/21-07  
 Facilities Management Office Trailer, Conference Room 1, adjacent to Building 1300, Livermore

The scope of the project includes providing a booster pump system to raise the campus domestic water pressure. Pressure reducing valves will be installed at selected buildings to prevent overpressure of plumbing fixtures. As an alternate, the contractor shall install an AquaShield enclosure (or approved equivalent product) around the booster pump station. The enclosure shall have a mill grade marine aluminum or stainless steel finish. The enclosure must also be fitted with a removable top and access doors on its front, side and rear.

**Addenda: 1**

**4/22/21 2:00 PM** 21-00941 Santa Cruz \$250,000 to \$285,000 **Public Works**

Plan Issuer: City of Santa Cruz 831-420-5327 831-420-5201

Prebid Conf: MAND 4/6 @ 10am- site Contract #: CWO 2021-003

The City of Santa Cruz is pleased to issue the Graham Hill Water Treatment Plant (GHWTP) Entrance Improvements Project for bidding. Bid documents will be provided to interested contractors by separate link after returning a completed non-disclosure agreement to the contact listed on the advertisement for bids.

The City of Santa Cruz Water Department is a public agency with the responsibility to provide safe drinking water to its customers. The GHWTP is the City's only surface water treatment facility and a critical component of the City's permitted drinking water system. The work involves expanding the existing roadway entrance to the GHWTP into a two-lane road, demolish the existing gate and replace it with two separate gates, relocate existing access control system and cameras, relocate existing personnel gate and mailbox, install traffic signs, install engineered gravel strips on the north and south side of the entrance roadway.

**[RFQ HOMELESS ENCAMPMENT ABATEMENT SERVICES - CITY OF PLEASANTON](#) Addenda: 0**

**4/22/21 3:00 PM** 21-00978 Pleasanton **Public Works**  
 Plan Issuer: City of Pleasanton - Engineering 925-931-5650 000-000-0000

The City of Pleasanton is seeking a qualified entity to provide homeless encampment abatement. Such services may include but are not limited to providing clean-up, transportation, and disposal of bio-hazardous and non-hazardous waste and other services as necessary, e.g., providing legal notice prior to cleanup as well as transportation of nonwaste items to the City's facility in Pleasanton (so that items may be stored, claimed, and collected by residents experiencing homelessness). Contractor shall provide all labor and expertise related to noticing, surveying, documenting, cleaning up, collecting or removing items, transporting personal items to storage, and disposing of garbage and hazardous items involving homeless encampment abatement actions on City property under an "as needed agreement." It is anticipated that the City will have approximately 10-12 clean-ups annually.

**RFP FOR CONTROL SYSTEMS INTEGRATION SERVICES FOR CAPITAL IMPROVEMENT PROJECTS - CONTRA COSTA WATER DISTRICT**

**Addenda: 0**

**4/23/21 3:00 PM 21-00963 Concord & Oakley**

**Public Works**

Plan Issuer: Contra Costa Water District-CCWD 925-688-8300 000-000-0000  
 Contract #: 2227

The District's facilities are monitored and controlled by three independent control systems; one controlling the distribution side and two controlling the Water Treatment Plants.

The distribution side consists of Supervisory Control and Data acquisition (SCADA) system, Remote Telemetry Units (RTUs) based on Schneider Electric PLSs, and radio communication system connecting all field RTUs to the SCADA system.

The control system at the two Water Treatment Plants (Randall-Bold and Bollman WTP), each consists of a PLC based system made by Schnider Electric and a Human Machine Interface (HMI) system based on Wonderware.

**RFP HAZARDOUS WASTE SERVICES - CONTRA COSTA WATER DISTRICT**

**Addenda: 0**

**4/23/21 4:00 PM 21-01102 Various Cities**

**Public Works**

Plan Issuer: Contra Costa Water District-CCWD

925-688-8300 000-000-0000

Contract #: 2230

The Contra Costa Water District (CCWD) is seeking the services of a qualified firm to provide hazardous waste contractor services. A qualified firm is one that possesses the licenses, personnel and equipment necessary to properly handle, transport and dispose of hazardous waste. The services will include planned non-emergency services (e.g., semi-annual disposal) and may include emergency spill response and homeless encampment cleanup.

Contact for Questions: Brian Jackson at [bjackson@ccwater.com](mailto:bjackson@ccwater.com)

**DOWNTOWN PARKING DISTRICT LOT MAINTENANCE**

**Addenda: 0**

**4/23/21 5:00 PM 21-01120 Salinas**

**Public Works**

Plan Issuer: City of Salinas [jamess@ci.salinas.ca.us](mailto:jamess@ci.salinas.ca.us)

831-758-7195

1. Maintenance of 7 parking lots and the two floors of the Salinas Street Garage.
2. Tasks Include:
  - a. Litter removal.
  - b. Empty all garbage cans at all lots at least once a week.
  - c. As needed, trim hedges and prune tree branches to keep sightlines and to prevent them from being obstructions to pedestrian and vehicle travel.
3. Contractor shall perform tasks every Monday. Keep parking lots and all floors of the Salinas Street garage free of litter (including trash, glass, weeds, etc.). Visit each lot to assess condition at least once a week. Report weekly to City staff.
4. Parking Lot 3 shall be visited 3 times a week to ensure garbage and litter are removed. Two of those days shall be on a Monday and Friday. The remaining day can be midweek or on a weekend whenever most needed.

Since these lots are visited by visitors to the downtown, it is important that potential respondents consider performing the tasks required in an environment where support for local businesses in the downtown area is paramount. The personnel and vehicles assigned to the tasks need to reflect a clean, competent, professional and friendly disposition to help provide the best customer experience in downtown Salinas.

The City is seeking a two-year contract with the selected bidder. The bids shall include all necessary personnel, equipment, communication devices, vehicles needed to complete the tasks associated with this Invitation to Bid.

**\$1,200,000**

**Public Works**

Plan Issuer: Union Sanitary District

510-477-7500

510-477-7509

Prebid Conf: 4/6 @ 9 AM via Zoom

Contract #: 800-494

The project is located at the northwest corner of the Alvarado Wastewater Treatment Plant near the south end of Veasy Street in Union City, CA and consists, in general, of the following work:

- Demolition and disposal of approximately 40 linear feet of 48-inch diameter pipeline.
- Replacement of approximately 20 linear feet of 48-inch diameter reinforced concrete pipe, RCP with centrifugally cast, fiberglass-reinforced, polymer mortar pipe, CCFRPM by open cut.
- Rehabilitation of approximately 61 linear feet of 48-inch diameter RCP by slip-lining.
- Construction of approximately 93 linear feet of 48-inch diameter CCFRPM by open cut.
- Construction of a concrete outlet structure consisting of a slab, headwalls, and wing walls.
- Placement of approximately 90 cubic yards of stone riprap for bank and channel protection.
- Removal and disposal of approximately 250 cubic yards of sediment to facilitate placement of the rip rap.
- Installation and removal of a temporary sheet pile cofferdam.
- Construction of an access vault and blow-off piping system on the existing outfall pipeline.
- Construction of a new riser pipe and cap on the new redundant pipeline.
- Dewatering of project excavations.
- Site restoration including final grading, paving, planting, and fencing.
- Survey of newly constructed facilities.
- Implementation of all mitigation measures in the Project's Mitigated Negative Declaration and Mitigation Monitoring and Reporting Plan.
- Bypass Contingency Allowance

Other work associated with the contract shall include, but not be limited to, mobilization / demobilization, clearing and grubbing, shoring and bracing of excavations, traffic control, erosion and sediment control, pipeline cleaning, debris removal and disposal, pre and post-rehabilitation closed circuit TV, CCTV inspection, and other items or details that are required by the Contract Documents.

PLEASE NOTE: All bidders submitting a bid must purchase a paper copy of the Project Manual from the District prior to the bid opening date.

Contract #: 20-217

The UCSF Medical Center Sterile Processing Department (SPD) project goal is to renovate the existing space, in a phased approach, to replace end of life equipment and make proper modifications to existing storage area to meet building and hospital code compliance requirements. This project is expected to improve workflow efficiencies, provide growth in capacity and volume without increasing labor expense. The SPD existing square footage is 7,334 sf. Original schematic design includes full equipment replacement and major modifications to existing operational and administrative spaces. Final project design will look to minimize schematic design to fit within allotted budget. The scope of work will include, but not be limited to, mechanical, electrical, plumbing, fire/life safety, and environmental controls.

Design and Preconstruction services will include, at a minimum, estimating, scheduling, constructability review, and bidding subcontractor design assist and construction bid packages, in addition to collaborating with other Project Team Members in good faith to achieve best value based on the University's Target Value Design and utilization of lean project delivery methods.

[CASTENADA NO. 1 AND NO. 2 RESERVOIRS REHABILITATION, GLEN RESERVOIR DEMOLITION, AND MULHOLLAND RESERVOIRS ROOF MAINTENANCE - EBMUD](#) **Addenda: 13**  
**4/28/21 1:30 PM** 21-00713 San Ramon, Lafayette & Orinda \$15,000,000 to \$18,000,000 **Public Works**

Plan Issuer: EBMUD-East Bay Municipal Utilities District 510-287-1040  
Prebid Conf: 3/16 @ 9 AM & 3/18 @ 9 AM (See Notice to Contractors for meeting site location) Contract #: 2169  
Work includes the rehabilitation of Castenada No. 1 and No. 2 steel reservoirs, the demolition of the Glen redwood reservoir, and roof improvements for Mulholland No. 1 and No.2 steel reservoirs. The Work includes demolition and removal of a redwood tank, steel reservoir roofs, and valve vaults; raising the height of steel tank walls; construction of aluminum dome roofs; repair of existing aluminum dome roofs; construction of valve vaults; abrasive blasting, priming, and coating of tank interiors and exteriors; and constructing civil, structural, mechanical, electrical, and pipeline improvements at the facilities. The reservoirs are located in San Ramon, Lafayette, and Orinda, respectively, in Contra Costa County, California.

PLEASE NOTE: The District will conduct two pre-bid jobsite inspection tours to familiarize prospective bidders with the project site and conditions. The inspections will be conducted on Tuesday, March 16, 2021 at 9 AM, and Thursday, March 18, 2021 at 9 AM. Attendees shall assemble at the Castenada Reservoirs site located at 5050 Crow Canyon Road, San Ramon. During the inspection tour, Attendees will also travel to Glen Reservoir located at the end of Monticello Road, Lafayette, and the Mulholland Reservoirs site located on Donald Dr, Orinda. This is the only time that the facilities will be open for inspection. The interior of the existing reservoirs will not be open for inspection. Each inspection will last approximately 1 hour. No photography by the Attendees will be allowed.

**RFP FOR ODOR AND CORROSION CONTROL SERVICES**

**Addenda: 0**

**4/28/21 2:00 PM 21-00892 Santa Cruz**

**Public Works**

Plan Issuer: County of Santa Cruz

831-454-2160

831-454-2385

Prebid Conf: MAND 4/6 @ 9am- 2750 Lode Street, Santa Cruz

The Santa Cruz County Sanitation District (District) invites sealed proposals for Odor and Corrosion Control Services from fully licensed, insured, bonded, certified CONTRACTORS to furnish all labor, tools, equipment, and incidentals required to provide services for the Santa Cruz County Sanitation District.

The District maintains 220 miles of gravity sewer mains, 14 miles of force mains, and 4,687 sewer manholes and 35 pump stations. The District encompasses the communities of Live Oak, portions of Aptos and Soquel and the City of Capitola. Our primary purpose is to maintain the sewer system transporting the wastewater to the City of Santa Cruz Wastewater Treatment Plant. The D.A. Porath Facility is the District's main facility and the average daily dry weather flows are approximately 3 million gallons per day before it is pumped to the City's treatment.

The District is soliciting bid proposals from qualified and experienced contractors to provide odor and corrosion control chemical, carbon media and services as detailed in this Specification.

The scope of this project shall include, but not be limited to:

- Provision of and delivery of chemical
- Provision of carbon and carbon change-out services
- Data collection
- Data Analysis
- Provision and installation of equipment and instrumentation
- Routine service and maintenance
- Remote Feed Adjustment Capability
- Remote H2S Monitoring
- Remote Tank Monitoring and Inventory Control Services
- Reporting

The term of this contract will be 2 (two) years with the option to extend for an additional 2 (two) one-year periods.

**4/28/21 2:30 PM 21-00969 San Francisco \$478,000 Public Works**  
 Plan Issuer: City & Co of San Francisco 415-554-6229  
 Contract #: 0000004295

The Work is located at various intersections in San Francisco, California and consists of curb ramp construction, traffic routing, and all related work.

**PROJECT DESCRIPTION:**

A. The Curb Ramp Work includes, but not limited to:

01. Traffic routing work;
02. Excavating, removing and disposing of existing pavement, concrete base, parking strip, curb and sidewalk;
03. Supporting and working around existing utilities;
04. Handling all drainage or ground water;
05. Removing surplus material;
06. Cleaning project site;
07. Furnishing and placing of backfill material;
08. Constructing 8-inch thick concrete pavement, 6 inch wide concrete curb, 3-½-inch thick concrete sidewalk, concrete curb ramps and installing detectable surface tiles;
09. Adjusting City-owned manhole frame and cover to grade;
10. Adjusting City-owned catch basin frame and grating to grade;
11. Adjusting City-owned castings to grade;
12. Performing all related and incidental work, all where and as shown on the Drawings and in accordance with the Project Manual.

B. Other Utility Work includes, but not limited to:

1. Adjusting pull boxes to new grade.

**RFP CORROSION CONTROL PROGRAM TECHNICAL SUPPORT SERVICES - CONTRA COSTA WATER DISTRICT**

**Addenda: 0**

**4/29/21 11:00 AM 21-01132 Various Cities**

**Public Works**

Plan Issuer: Contra Costa Water District-CCWD

925-688-8300 000-000-0000

Contract #: 2250

The District's water service facilities are typically located in Central and Eastern Contra Costa County and include various cathodic protection (CP) related systems for approximately 100 miles of metallic pipeline and 19 steel reservoir tanks. During the term of this services agreement the District is looking for a full-service Corrosion Control Engineering firm, to provide as-needed corrosion control technical services to assist in the operation, maintenance, troubleshooting, and construction of various existing or new CP systems. In addition to the aforementioned field-related services, the District may require other corrosion control support such as design consultation, maintenance practices recommendations, and training of District staff.

**RFQ BECHTEL ENGINEERING CENTER ADDITION AND RENOVATION - GEOTECHNICAL SERVICES - UC BERKELEY** Addenda: 0

**4/29/21 2:00 PM** 21-01142 Berkeley **School**  
 Plan Issuer: UC Berkeley - Capital Projects 510-642-6273 000-000-0000  
 Contract #: 12803A

The Berkeley campus of the University of California requests that interested Consultants submit written statements of qualifications to provide geotechnical services for the Bechtel Engineering Center Addition and Renovation for the College of Engineering.

The Bechtel Engineering Center Addition and Renovation project will be located at the existing Bechtel Engineering Center. It is bounded by Davis Hall to the north; Hearst Memorial Mining Building to the east; Evans Hall to the south; and McLaughlin Hall and the West Plaza to the west. The existing Bechtel Engineering Center houses critical community functions, including study areas, an auditorium, the Engineering Library, and Engineering Student Services (ESS) offices. Bechtel Engineering Center is located on the northern edge of the Central Glade, an iconic landscape element of the campus's Classical Core, which is listed on the National Register of Historic Places.

**RFQ FOR CONSTRUCTION MANAGEMENT, INSPECTION, AND TESTING SERVICES FOR THE THIRD STREET REHABILITATION PROJECT**

**Addenda: 3**

**4/29/21 4:00 PM** 21-01141 San Rafael **Public Works**  
 Plan Issuer: City of San Rafael-DPW 415-485-3355  
 Contract #: 11315

The City of San Rafael hereby requests Statements of Qualifications for Construction Management, Inspection, and Testing Services for the Third Street Rehabilitation Project. The following improvements are included in the Project scope:

01. Repaving the entire corridor.
02. Geometric and/or raised intersections will be constructed at several intersections. This may include curb ramps and widened sidewalks.
03. Additional work at intersections includes traffic signal replacement, controller upgrades, safety lighting, and other traffic control devices.
04. At Second Street/East Avenue and Third Street/Brooks Street new traffic signals will be installed.
05. The project will add class IV two directional bike lane from Marquard Avenue to Shaver Street.
06. The City's project includes Marin Municipal Water District (MMWD) and San Rafael Sanitation District (SRSD) pipeline replacement projects. While all work associated with the two pipeline projects will be bid and tracked separately including the construction management fees accrued by the firm selected. The pipeline replacement projects are estimated at over \$2 million dollars for MMWD and around \$1 million for SRSD. These are anticipated to be completed within the first half of the contract.
07. Additional utility improvements with the project include conduit and fiber installation for signal interconnect and future telecom fiber. This includes a bid alternative to extend fiber and conduit to a couple of the City's public buildings not on Third Street.
08. Drainage improvements include replacement of City infrastructure and repairs to a large box culvert under Second Street.
09. Landscaping is limited to tree installation and replacing median landscaping on Second Street and street trees along Second and Third Streets.

**L TARAVAL IMPROVEMENT PROJECT SUNSET BOULEVARD TO WEST PORTAL - SFMTA**

**Addenda: 13**

**5/1/21 3:00 PM 21-00161 San Francisco \$90,000,000 Public Works**

Plan Issuer: City & Co of San Francisco (SFMTA) allan.andaya@sfmta.com 415-701-4666 000-000-0000

Prebid Conf: 2/4 @ 10 AM (via Zoom. See Invitation for Bid for meeting participation details) Contract #: 1308R

The work under this Contract is to construct capital improvements along the L Taraval corridor between Sunset Boulevard and West Portal. The Work, as detailed in the Plans and Specifications, consists generally of the following:

01. Perform selective demolition of existing facilities.
02. Replace existing tangent paved embedded tie and ballast tracks along the L Taraval Line from Sunset Boulevard and Taraval Street to Forest Side Avenue and Ulloa Street with new direct fixation track and fastening systems, using 115# RE rails.
03. Replace existing track pavement with track concrete pavement within the track right-of-way.
04. Reconstruct Overhead Contact System (OCS), including poles and pole foundations, special work, trolley wires, tangent and feeder spans, insulators and various OCS components.
05. Renovate and reconstruct roadway pavement, parking strips and gutters, located between the sidewalk and the reconstructed trackway as well as at intersections.
06. Overlay the entire roadway with a 2-inch thick layer of asphalt concrete wearing surface from Sunset Boulevard to Forest Side Avenue along project alignment, except at trackway and the parking strips and gutters.
07. Construct temporary boarding platforms, as necessary.
08. Construct new boarding islands and high level accessible platforms and reconstruct or modify existing boarding islands and platforms.
09. Coordinate installation of bus shelters with electrical power feed for Next Bus signage on the boarding islands.
10. Construct and install architectural elements and components such as railings, trash receptacles, and bike racks.
11. Construct sidewalk bulb-outs and curb ramps.
12. Furnish and install and establish landscape planting.
13. Tree removal & stump grinding.
14. Install custom thermoplastic crosswalks.
15. Furnish and install new roadway lighting poles, fixtures and bracket arms, and relocate existing fixtures to new poles or combination trolley/streetlight poles.
16. Furnish and install new streetlight conduit, pull boxes, and underground and overhead service connections for streetlights.
17. Provide new traction power feeder cable grounding of new trolley poles.
18. Provide new traction power riser cables and multi-tap connectors for new trolley poles.
19. Provide new traction power feeder cables for existing sectionalizing switch and for feeder circuit WP-13.
20. Replace feeders in substation with new FBK type H breakers for feeder circuits T-1, T-2, and WP-13.
21. Add electrical current telemetry devices to feeder circuits T-1, T-2, and WP-13.
22. Upgrade Remote Terminal Unit (RTU) and annunciator units at Taraval and West Portal substations.
23. Upgrade Traction Power SCADA system at Taraval and West Portal substations and Power Control Center (PCC).
24. Provide new VTAG train signaling system at select locations.
25. Replace five (5) all way stop intersections with traffic signals and install intersection controller (IC) at each intersection.
26. Replace existing traffic signals.
27. Provide rapid rectangular flashing beacons.
28. Construct traffic signal conduit and pull boxes for future signalization and future interconnect fiber optic.
29. The Sewer Work to be performed includes but is not limited to constructing 12 to 30-inch diameter vitrified clay pipes and reinforced concrete pipes, cured-in-place lining 2'x3' and 2'-6"x3'-9" flat top concrete sewers, constructing new manholes, replacing side sewers, cured-in-place lining of existing side sewers, reconstructing culverts, mortaring manholes, plugging & filling existing sewer systems, performing post video inspections, and all other related work.
30. The work to be performed under this contract includes installing : approximately 20,000 linear feet of 4-, 6- and 8-inch ductile iron pipe; approximately 1,000 linear feet of 4-, 6- and 8- inch restrained joint ductile iron pipe; approximately 1,300 linear feet of 12-inch restrained joint ductile iron pipe; approximately 200 linear feet of 16-inch restrained joint ductile iron pipe; ductile iron joint fittings and valve assemblies; corrosion mitigation system; 1-inch to 8-inch service piping; pipe abandonment; open trench installation of nine (9) steel casings with ductile iron carrier pipe (restrained joint type) at Muni track crossings; and open trench installation of one (1) steel casing near 28th Avenue.
31. Replace all low pressure fire hydrants and add new fire low pressure hydrants and associated fittings and valves.
32. Provide all excavation and shoring at all connections, disconnections, and at service pits, where the work will be performed by SFWD.
33. Provide all excavation and excavation support work for PG&E hot tapping of deactivated gas mains.
34. Provide traffic control and support for all work.

(This Project is a REBID. Previously scheduled bid date was 9/12/19).

**Mixed-Use**

Plan Issuer: Nibbi Brothers Construction paris@nibbi.com

415-863-1820 415-863-1150

Prebid Conf: 4/19 @ 10:30 AM (Virtual meeting. Please email Jacqueline Leiva at: jacqueline@nibbi.com to be invited to the call).

Baines-Nibbi Joint Venture has been selected as the General Contractor for the Sunnydale Block 3A & 3B Housing project in San Francisco. They are in receipt of the 100%DD Set and are currently requesting bid proposals from qualified subcontractors and suppliers including those certified with the San Francisco Contract Monitoring Department (CMD) as small business enterprises (SBE's) for Design-Build Fire Protection, Photovoltaic and Exterior Building Maintenance.

Block 3A (Lot 3) will contain a building consisting of 4 stories of type V construction over one story of type I. The ground floor will host an early childhood education center, retail and restaurants, a wellness center, and residential common spaces. The upper floors will contain residential units and service spaces.

Block 3B (Lot 4) will contain a building consisting of 4 stories of type V construction over one story of type I with a basement. The first story will host a garage serving both lots, retail and restaurants, and residential units. The basement will provide additional parking and maintenance space. The upper floors will contain residential units and service spaces.

The form for a mandatory pass will need to be filled out & turned in with a copy of a valid picture identification at least seven (7) days prior to the Site Tour.

**MCLAREN MANSELL TAI CHI COURT**

**Addenda: 0**

**5/4/21 2:30 PM 21-01064 San Francisco**

**Public Works**

Plan Issuer: City & Co of San Francisco Recreation & Parks Dept 415-831-2779 000-000-0000  
sean.mcfadden@sfgov.org

Contract #: CON21-0029

BID ITEM 1: Mansell Tai Chi Court and Park Access Improvements - Base Bid Court, Pathways and Accessibility Improvements (see drawings):

- a. Demolish existing parking lot, install Tai Chi Court and pathway around court.
- b. Repair and replace existing pathways as needed to meet ADA from access point at John F Shelley Dr.
- c. Install accessible parking space at John F Shelley Drive, including necessary repairs to existing paving and bollards, relocation and widening of existing gate, and installation of city-provided vehicle barrier logs.
- d. Five (5) new surface-mount benches in Tai Chi Court area.

BID ITEM 2: Mansell Tai Chi Court Planting and Irrigation - Base Bid Planting and Irrigation (see drawings):

- e. New planting and turf restoration including provision and installation of fourteen (14) 24" box trees and seeded lawn area (approx. 11000 square feet). Includes maintenance period of three months.
- f. Provide approximately two hundred seventy-five 1-gallon shrubs (approx. 275) and coordinate for RPD to install after soils preparation.
- g. New soils, soil amendment and irrigation as described in drawings and specifications.

ALTERNATE BID ITEM 1: Boulders in Lieu of Vehicle Barrier Logs - Boulders at John F Shelley Drive Entry and Accessible Parking Stall:

- a. In lieu of city-provided Vehicle Barrier Logs, provide and install eight (8) Boulders as described in specifications. Exact locations and spacing to be determined in the field with landscape architect and city representative.

All questions regarding this Project are due no later than Friday April 23, 2021, by 5:00 PM. Questions must be directed to Alex Schuknecht, Project Manager, at (415) 215-9302, or by email to: Alex.Schuknecht@sfgov.org and cc: Sean.Mcfadden@sfgov.org

Plan Issuer: Nibbi Brothers Construction [kristinm@nibbi.com](mailto:kristinm@nibbi.com)

415-863-1820

415-241-2951

Prebid Conf: 4/21 @ 10:30 AM (Virtual meeting. Please email Jacqueline Leiva at: [jacqueinel@nibbi.com](mailto:jacqueinel@nibbi.com) to be invited to the call).

Nibbi Brothers has been selected as the General Contractor for the Mission Bay Block 9A housing project in San Francisco. They are in receipt of the 100% DD set and are currently requesting bid proposals from qualified subcontractors and suppliers including those certified with the Office of Community Investment and Infrastructure (OCII)/Successor to SFRA for Design-Build Fire Protection & Photovoltaic Panels.

The 350 China Basin Street project consists of approximately 179,937 GSF sprinklered Type I-B (concrete superstructure + misc steel posts and beams at rooftop structures & misc. other locations), eight-story mid-rise residential building, 148 affordable for sale condo units including 1, 2, and 3-bedroom configurations. The Project will be approximately 89'-4" to the roof structure, as measured from the lowest entry point on the site (along China Basin Street). The proposed Project would include new sidewalks & street trees, utility infrastructure and landscaping as well as common, landscaped open space for residents at levels 02 and 09 Roof. The building design will incorporate sustainable building strategies to achieve LEED Silver or Green Point Rated.

	Prebid Conf: MAND 4/14 @ 10 AM at 2900 Main Street, Alameda				Contract #: CS 01-21-02	
	Alameda Municipal Power (AMP) is the City of Alameda's not-for-profit electric municipal utility, serving residents and businesses for over 130 years. Its reliable electric supply system covers 23 square miles and provides power to more than 34,000 customers. AMP has two main substations namely Cartwright and Jenney Substations. AMP also maintains and operates certain electric facilities at Northern California Power Agency Combustion Turbine Project Number One Substation (NCPA-CT1). NCPA-CT1 substation is shared by NCPA and AMP for the former to interconnect the Combustion Turbine generator units and for AMP to distribute power to customers within the City of Alameda. AMP's 115-kV transmission system is fed from two separate radially connected lines coming from Pacific Gas Electric's (PG&E) Substations C and J, both located in Oakland, California.					
	The existing Westinghouse 121DWE40-2000A Sulfur Hexafluoride (SF6) insulated high voltage dead tank circuit breakers (CBs) CB212 and CB222 at NCPA-CT1 Substation served as the incoming main feeds from 115kV transmission lines connected to PG&E Station C and AMP Cartwright Substation. These SF6 CBs have been in service for over 35 years and have exceeded its service life. This project involves replacing two (2) SF6 CB with two (2) new Siemens Motor Spring Operating Mechanism SF6 CBs. CB tanks, motor operator/terminal cabinets, new CB structural steel support lattice pieces, and their associated parts have already been delivered and are currently stored at AMP Warehouse located at 1835 Oak Street.

**PREQUALIFICATION WIDENING OF US 101 SB TO SR 87 SB CONNECTOR & US 101 SB ON-RAMP FROM STORY ROAD - SCVTA** **Addenda: 4**

SCOL70 **5/5/21 5:00 PM** 21-00241 Santa Clara County \$2,900,000 to \$3,500,000 **Public Works**  
Plan Issuer: SCVTA -Santa Clara Valley Transportation Authority 408-321-7189  
Prebid Conf: Non-Mandatory 4/19 @ 10AM (Via Microsoft Teams) Contract #: C19240

At Location 1, the Project will widen the existing connector ramp to provide two standard 12-foot mixed flow lanes with standard inside and outside shoulders. The improvements involve restriping, pavement widening, reconstructing a lined trapezoidal ditch, and installing a new Traffic Monitoring System (TMS).

At Location 2, the Project will widen the existing diagonal on-ramp to add a standard 12-foot High Occupancy Vehicle (HOV) lane. The Project will also re stripe the adjacent Collector-Distributor (C-D) to Southbound US-101 to provide a standard 12-foot HOV lane. The improvements involve restriping, pavement widening, extending a reinforced concrete box culvert, and installing new ramp metering systems.

**NEW MWWTP ADMIN, LAB, AND DEWATERING BUILDINGS HVAC IMPROVEMENTS - EBMUD** **Addenda: 0**  
**5/12/21 1:30 PM** 21-01158 Oakland \$4,410,000 to \$4,900,000 **Public Works**

Plan Issuer: EBMUD-East Bay Municipal Utilities District 510-287-1040  
 Prebid Conf: 4/20 @ 9 AM (Virtual meeting. If interested in attending Pre Bid Meeting and/or Job Walks, email Dominic La Marche at: dominic.lamarche@ebmud.com no later than April 16, 2021) Contract #: SD-402

Work for this Project will occur at the following four buildings located at the MWWTP: Administration Building, Laboratory Building, Dewatering Building, and Thickening Building. The Administration Building and Laboratory Building are adjoining structures and have a common HVAC system and will therefore be treated as a single building. Similarly, the Dewatering and Thickening Building are adjoining and share HVAC equipment and will therefore be treated as a single building and referred to as just "The Dewatering Building."

Work includes the following: Administration/Laboratory Building - Select demolition and replacement of existing 200 ton air cooled chiller, recirculation pumps, expansion tank and associated chilled water piping; select demolition of existing process chiller and replacement with 5 ton air cooled chiller; select demolition and replacement of 1,000 CFM exhaust fan and 1,000 CFM fumehood exhaust fan; demolition of existing built up roof and replacement with modified bitumen roof; installation of fall protection railing around perimeter of building roof; select demolition and replacement of chilled water pipe insulation within building's above ceiling space; installation of pipe supports on roof for future pipe; furnishing of temporary chiller to maintain building operation during construction; handling and proper disposal of debris and hazardous waste; and all required testing and training.

Dewatering Building - Select demolition and replacement of 45,000 CFM roof mounted vane axial exhaust fan; select demolition and replacement of 47,30 CFM roof mounted vane axial exhaust fan; select demolition and replacement of 40,000 CFM supply fan located in building mechanical room; modification of fiberglass and sheet metal ductwork; installation of exhaust dampers on supply and exhaust grilles; installation of split system; rebalancing of building ventilation system; handling and proper disposal of debris and hazardous waste; and all required testing and training.

PLEASE NOTE: Job Walks will be held on the following dates/times. Please see Notice to Contractors for meeting participation instructions.

**REQUEST FOR STATEMENTS OF PRE-QUALIFICATIONS FROM INTERESTED ELECTRICAL CONTRACTORS (E-SOPQ) - ORINDA WTP DISINFECTION AND CHEMICAL SYSTEMS SAFETY IMPROVEMENTS - EBMUD**

**Addenda: 0**

**5/14/21 10:00 AM** 21-01090 Orinda \$157,000,000 to \$222,000,000 **Public Works**  
 Plan Issuer: EBMUD-East Bay Municipal Utilities District 510-287-1040  
 Contract #: 2139J

Notice is hereby given that the East Bay Municipal Utility District (hereinafter referred to as the "District") has determined that all Electrical Contractors sub-bidding on the Specification 2139 - Orinda Water Treatment Plant Disinfection and Chemical Systems Safety Improvements ("Project") shall be pre-qualified prior to submitting a sub-bid on the Project. It is mandatory that all Electrical Contractors who intend to submit a sub-bid for the Project ("Prospective Sub-Bidders"), fully complete the Electrical Subcontractor's Statements of Pre-Qualifications ("E-SOPQ") package, provide all materials requested herein, and be pre-qualified by the District to be on the final qualified sub-bidder's list. The final list of pre-qualified Electrical Contractors will be stated in the Project Bid Documents.

The District is upgrading existing facilities and constructing new facilities at the Orinda Water Treatment Plant (Orinda WTP), in the city of Orinda, California. The Orinda WTP is located north of Highway 24 and is bounded by Camino Pablo on the southwest and San Pablo Creek on the northeast. The primary goal of the Project is to construct and commission a new 200 million gallons per day (mgd) Ultraviolet (UV) Disinfection Facility and Chlorine Contact Basin (CCB). These facilities will enhance the Orinda WTP's disinfection capabilities. Attachment 2 shows the project site plan and rendered, plan and section drawings of the new disinfection complex.

The Project electrical work generally consists of:

- South Electrical Building - prefabricated power building with medium voltage transformers, medium voltage switchgear, redundant 48VDC battery systems, standby power low voltage switchgear with step up transformer, protection and automation controls, panelboards, transfer switches, dry type transformers, lighting and air conditioning.
- Los Altos Pumping Plant Power Building – prefabricated power building with medium voltage motor control centers, cast coil transformers, low voltage switchgear, protection and automation controls, panelboards, transfer switches, dry type transformers, portable generator switchboard, lighting and air conditioning.
- Maintenance and UV Electrical Building – major electrical equipment includes cast coil transformers, low voltage switchgear, protection and automation controls, panelboards, transfer switches, dry type transformers, uninterruptible power supplies, and portable generator switchboard. Work also includes disconnects, junction terminal boxes, lighting, receptacles, conduits and cables. Work includes installation of UV Vendor supplied control panels.
- UV Disinfection Facility - electrical equipment includes panelboards, dry type transformers, motor starters, disconnects, junction terminal boxes, lighting, receptacles, conduits and cables. Work includes installation of UV Vendor supplied equipment.
- Other miscellaneous facilities – electrical equipment includes panelboards, dry type transformers, motor starters, disconnects, junction terminal boxes, lighting, receptacles, conduits and cables.
- Site work - medium voltage and low voltage duct banks with underground pull boxes, temporary connections of existing facilities, permanent connections of existing and new facilities, Standby South Generator with fuel storage tanks, and site lighting.
- Raw water conveyance system improvements - replacement of three weir gates at the Briones Diversion Works (one 7' x 7' gate, two 6' x 7' gates), installation of new ultrasonic flowmeters at the OWTP north and south raw water channels.
- Chemical systems safety improvements - demolition and replacement of chemical feed systems for primary coagulant, coagulant polymer, sodium hypochlorite, ammonia, sodium bisulfite, caustic soda, and fluoride, including bulk tanks, pumps, and chemical piping from truck unloading to chemical injection, as well as temporary chemical feed and storage system for plant operation during construction of these improvements.
- Miscellaneous Items - Programming of protection and automation control systems. NETA testing of electrical systems. Factory and Field Testing. Start-up. Training.

The Project instrumentation work generally consists of:

- New and Existing Facilities - control panels, work stations, water quality analyzers, instrumentation, telephone system, fiber patch panels, CCTV system, access control system, fire alarm system.
- Testing of SCADA operation and testing of controls systems.
- Site work - expanded fiber distribution system.

**REQUEST FOR STATEMENTS OF PRE-QUALIFICATIONS FROM INTERESTED TRENCHLESS PIPE INSTALLATION CONTRACTORS (TPI-SOPQ) - ORINDA WTP DISINFECTION AND CHEMICAL SYSTEMS SAFETY IMPROVEMENTS - EBMUD**

**Addenda: 0**

**5/14/21 10:00 AM** 21-01089 Orinda \$157,000,000 to \$222,000,000 **Public Works**  
 Plan Issuer: EBMUD-East Bay Municipal Utilities District 510-287-1040  
 Contract #: 2139I

Notice is hereby given that the East Bay Municipal Utility District (hereinafter referred to as the "District") has determined that all Trenchless Pipe Installation CONTRACTORS sub-bidding on the Specification 2139 - Orinda Water Treatment Plant Disinfection and Chemical Systems Safety Improvements ("Project") shall be pre-qualified prior to submitting a sub-bid on the Project. It is mandatory that all Trenchless Pipe Installation CONTRACTORS who intend to submit a sub-bid for the Project ("Prospective Sub-Bidders"), fully complete the Trenchless Pipe Installation's Statements of Pre-Qualifications ("TPI-SOPQ") package, provide all materials requested herein, and be pre-qualified by the District to be on the final qualified sub-bidder's list. The final list of pre-qualified Trenchless Pipe Installation CONTRACTORS will be stated in the Project Bid Documents.

The District is upgrading existing facilities and constructing new facilities at the Orinda Water Treatment Plant (Orinda WTP), in the city of Orinda, California. The Orinda WTP is located north of Highway 24 and is bounded by Camino Pablo on the southwest and San Pablo Creek on the northeast. The primary goal of the Project is to construct and commission a new 200 million gallons per day (mgd) Ultraviolet (UV) Disinfection Facility and Chlorine Contact Basin (CCB). These facilities will enhance the Orinda WTP's disinfection capabilities. Attachment 2 shows the project site plan and rendered, plan and section drawings of the new disinfection complex.

The Project trenchless pipe installation work considered as part of this TPI-SOPQ generally consists of pipe jacking to construct the following:

- 108-inch pipe from the CCB to Effluent 1.
- 108-inch pipe from the CCB to Los Altos Pumping Plant No. 1.
- 48-inch pipe from the CCB to Los Altos Pumping Plant No. 2.
- 78-inch pipe from Effluent 1 to Effluent 2.

The pipes will be steel with a steel carrier pipe.

**CONSTRUCTION OF MAIN LIFT ODOROUS EMISSIONS - CITY OF MILPITAS**

**Addenda: 6**

**SCOL79 5/14/21 2:00 PM** 21-00958 Milpitas \$1,775,000 to \$1,925,000 **Public Works**  
 Plan Issuer: City of Milpitas - DPW 408-586-3300  
 Prebid Conf: MAND Mandatory Pre-Bid 4/13 @ 10AM (Via Zoom Conference); Mandatory Pre-Bid Contract #: 2511  
 Site Walk 4/14 & 4/15 (Made by Appointment Only); Subcontractor Only Site Visit  
 4/20 @ 2PM

1. Site preparation and cleaning.
2. Procurement and installation of biotrickling filter odor control system, including connection of ductwork, water piping, drainage piping, and power and control wiring in accordance with the manufacturer's installation instructions.
3. Construction of concrete pad for placement of the biotrickling filter and supply and installation of system anchor bolts.
4. Construction of concrete equipment pads for foul air blower and supply and installation of anchor bolts.
5. Installation of water piping and drain piping to and from the biotrickling filter.
6. Supply and installation of odorous air ductwork, including flex connectors and damper valves.

**Addenda: 0**

**5/14/21 5:00 PM** 21-01087 Orinda **\$157,000,000 to \$222,000,000 Public Works**

Plan Issuer: EBMUD-East Bay Municipal Utilities District 510-287-1040

Contract #: 2139H

Notice is hereby given that the East Bay Municipal Utility District (hereinafter referred to as the "District") has determined that all EXCAVATION SUPPORT CONTRACTORS sub-bidding on the Specification 2139 - Orinda Water Treatment Plant Disinfection and Chemical Systems Safety Improvements ("Project") shall be pre-qualified prior to submitting a sub-bid on the Project. It is mandatory that all EXCAVATION SUPPORT CONTRACTORS who intend to submit a sub-bid for the Project ("Prospective Sub-Bidders"), fully complete the Excavation Support's Statements of Pre-Qualifications ("EXC-SOPQ") package, provide all materials requested herein, and be pre-qualified by the District to be on the final qualified sub-bidder's list. The final list of pre-qualified EXCAVATION SUPPORT CONTRACTORS will be stated in the Project Bid Documents.

The District is upgrading existing facilities and constructing new facilities at the Orinda Water Treatment Plant (Orinda WTP), in the city of Orinda, California. The Orinda WTP is located north of Highway 24 and is bounded by Camino Pablo on the southwest and San Pablo Creek on the northeast. The primary goal of the Project is to construct and commission a new 200 million gallons per day (mgd) Ultraviolet (UV) Disinfection Facility and Chlorine Contact Basin (CCB). These facilities will enhance the Orinda WTP's disinfection capabilities. Attachment 2 shows the project site plan and rendered, plan and section drawings of the new disinfection complex. The Project excavation support work considered as part of this EXC-SOPQ includes construction of secant pile shoring systems to support excavations for:

- The primary excavation for the UV and CCB facilities
- Effluent 1 tie-in pit
- Effluent 2 tie-in pit

The secant piles are expected to extend up to 65-feet below grade. Tie-backs and/or internal bracing are anticipated to provide support for the shoring systems.

**REQUESTS FOR STATEMENTS OF PRE-QUALIFICATIONS FROM INTERESTED GENERAL CONTRACTORS (GC-SOPQ) - ORINDA WTP DISINFECTION AND CHEMICAL SYSTEMS SAFETY IMPROVEMENTS - EBMUD**

**Addenda: 0**

<b>5/14/21</b>	<b>5:00 PM</b>	21-01088	Orinda	\$157,000,000 to \$222,000,000	<b>Public Works</b>
Plan Issuer: EBMUD-East Bay Municipal Utilities District				510-287-1040	Contract #: 2139G

Notice is hereby given that the East Bay Municipal Utility District (hereinafter referred to as the "District") has determined that all General Contractors bidding on the Specification 2139 - Orinda Water Treatment Plant Disinfection and Chemical Systems Safety Improvements ("Project") shall be pre-qualified prior to submitting a Bid on the Project. It is mandatory that all General Contractors who intend to submit a Bid for the Project ("Prospective Bidders"), fully complete the General Contractor's Statements of Pre-Qualifications ("GC-SOPQ") package, provide all materials requested herein, and be pre-qualified by the District to be on the final qualified Bidder's list. The final list of pre-qualified General Contractors will be stated in the Project Bid Documents.

The District is upgrading existing facilities and constructing new facilities at the Orinda Water Treatment Plant (Orinda WTP), in the city of Orinda, California. The Orinda WTP is located north of Highway 24 and is bounded by Camino Pablo on the southwest and San Pablo Creek on the northeast. The primary goal of the Project is to construct and commission a new 200 million gallons per day (mgd) Ultraviolet (UV) Disinfection Facility and Chlorine Contact Basin (CCB). These facilities will enhance the Orinda WTP's disinfection capabilities. Attachment 2 shows the project site plan and rendered, plan and section drawings of the new disinfection complex.

The UV and CCB facilities will be constructed below ground on the site of an existing maintenance building. The excavation for these facilities will be shored using a secant pile shoring system, and its deepest point will be approximately 60 feet below existing grade.

Filtered water will flow to the UV Facility via a new 108-inch pipe to be installed via an open-face trenchless pipe jacking method. Similarly, disinfected water will flow from the CCB to the existing Claremont Tunnel via a new 108-inch pipe installed using trenchless methods. An additional 48-inch pipe, which will also be installed using a trenchless technique, will feed water from the CCB to Los Altos Pumping Plant No. 2 (LAPP2).

The Project includes four major water piping tie-ins:

- 48-inch tie-in to Effluent 1
- 72-inch tie-in to Effluent 2
- 48-inch tie-in to LAPP2
- 108-inch tie-in to Claremont Tunnel

The Project also includes numerous electrical, communications, chemical, and utility tie-ins.

A new two-story Maintenance and UV Electrical Building (MAUVE) will be constructed above the UV Facility to house the UV system electrical equipment and various District maintenance shops and related facilities. The Project also includes construction of a Grounds Maintenance Building and parking area for District staff.

The Project includes procurement and installation of two prefabricated power buildings that include medium voltage transformers, medium voltage switchgear, medium voltage motor control centers, cast coil transformers, low voltage switchgear, redundant 48VDC battery systems, standby power low voltage switchgear with step up transformer, protection and automation controls, panelboards, transfer switches, dry type transformers, and lighting and air conditioning. The Project also includes a new standby generator, fuel tank, and piping.

The Project includes an expanded fiber distribution system for both new and existing facilities, as well as new control panels, workstations, instrumentation, CCTV system, access control equipment, and fire alarm systems for the new facilities.

The Project also includes improvements to the chemical storage and feed systems, including demolition and replacement of chemical feed systems for primary coagulant, coagulant polymer, sodium hypochlorite, ammonia, sodium bisulfite, caustic soda, and fluoride, including bulk tanks, pumps, and chemical piping from truck unloading to chemical injection, as well as temporary chemical feed and storage system for plant operation during construction of these improvements.

Raw water conveyance system improvements are also part of the Project, including replacement of three weir gates at the Briones Diversion Works (one 7' x 7' gate, two 6' x 7' gates), installation of new ultrasonic flowmeters at the Orinda WTP north and south raw water channels, and inspection, repair, and expansion of siphons located at the OWTP south spillway to San Pablo Creek.

The treatment plant will be in operation during construction. Partial shutdowns of the plant will be allowed, and two complete plant shutdown period will also be permitted to make tie-ins to existing infrastructure. The anticipated duration of the construction project is 65 months.

Plan Issuer: Central Contra Costa Sanitary District

925-229-7100

000-000-0000

Prebid Conf: MAND All Bidders must visit the Project Site prior to submitting their sealed Bid.

Contract #: 7348

Bidders must do so by appointment only. Appointments will only be available on an individual basis on Tuesdays, Wednesdays and Thursdays between 9 a.m. and 4 p.m., beginning the week of March 1, 2021. To schedule an appointment, please contact Nathan Hodges at nhodges@cen

The Project generally consists of major renovation in an operating industrial facility and includes demolition, structural, architectural, mechanical, electrical, instrumentation, and controls upgrades for Sludge Blending/Storage, Sludge Dewatering System, Multiple Hearth Furnaces, Wet Scrubber and Air Pollution Control, Seismic Strengthening, and Ash Handling Facilities.

PLEASE NOTE: Due to COVID-19 safety concerns, there will be no in-person pre-bid meeting for this Project. A pre-bid video will be posted on PlanetBids on March 2, 2021.

## INTRODUCTION

Earthquakes, unlike other natural disasters, do not have a season. If you work or live in an area that is prone to earthquakes, it is a matter of when, **not** if. To help you get through an earthquake, it is recommended that you prepare to the best of your ability. In this lesson, we will cover topics such as hazards that you should plan for, things that you can do to help make your building survivable, securing furniture and other objects, emergency plans and kits, and documentation.

## HAZARDS AND ANALYSIS

One of the first steps that you should do when preparing for an emergency is to think of the potential hazards that you and others could be exposed to both during, and after the incident. In the case of earthquakes, you could potentially be exposed to:

- Cuts and lacerations from broken glass.
- Head injuries from falling objects.
- Crushed extremities from falling objects or furniture.
- Lack of water from damaged infrastructure pipelines.
- Fires from ruptured gas lines and other flammables being ignited, and
- Collapsing buildings.

To make sure you are aware of the specific hazards that you could potentially experience in the work environment, it is advised that you identify all potential areas that could be hazardous when an earthquake hits and plan accordingly.

## BUILDING SURVIVABILITY

Technology and safe building techniques have come a long way in helping buildings survive earthquakes. Before an earthquake hits, it is recommended that you do the following to help maximize your buildings ability to survive the earthquake:

- Check the foundation of the building for cracks and other damage. Have cracks and damaged areas repaired as soon as possible.
- Also, research retrofitting options that may be available for your building. You can have a licensed engineer assess your building to both learn about vulnerable spots and retrofitting options.

## SECURING FURNITURE AND OTHER OBJECTS

One of the biggest sources of injuries that occur during earthquakes are from falling objects. To help minimize the chances of injuries, it is recommended that you secure furniture and other objects before an earthquake hits. Secure furniture and items using:

- Metal straps to secure water heaters to wall studs.
- Closed hooks or velcro for hung artwork that isn't soft.
- Earthquake straps to secure or brace items such as computers and TVs.
- Brackets and other furniture securing hardware to secure top-heavy furniture and appliances to wall studs.
- Gauge slack safety cables for overhead items such as ceiling fans, chandeliers, pendent lighting, and so on.
- Wire loops or closed eye hooks for hanging plants.
- Guardrails or bungee cords on bookshelves.
- Museum or earthquake wax, putty, or gel to secure fragile items to shelving.

- Latches on cabinets and other drawers that may have the potential to open during a quake.

Additionally, you may also want to look at your employees' workspaces and consider the following:

- Moving heavy pieces of furniture or equipment away from doors and other areas of egress.
- Having overhead objects that are 5 pounds or over secured to structural framing.
- Securing file cabinets to walls; have the drawers locked when not in use.
- Moving desks away from windows.
- Using shatter-resistant film on windows to help prevent the glass from breaking.
- Removing heavy objects that have the potential to fall from overhead areas.
- And locking the wheels on rolling carts when they are not in use.

## EMERGENCY PLANS AND KITS

### Emergency Plan

Just as with any emergency, having a plan in place before the event is vital in not only protecting you, but the protection of your employees. An emergency plan for an earthquake should contain the following information:

- Names of employees who will oversee implementation of the plan.
- The identification of response team members and their contact information.
- Information on response team responsibilities and how these will be implemented.
- A list of employees who have been trained in first aid and CPR.
- Updated contact information for all employees.
- Contact information for local emergency services.
- The identification of where utilities and electrical panels are located and how they can be shut off.
- Instructions for what employees should do when they feel shaking. This should include "Drop, Cover, and Hold on."
- A plan for what employees should do once the shaking has subsided. This should include procedures for aftershocks.
- Copies of evacuation maps.
- Designated meeting areas in the event that the building needs to be evacuated.
- A system for the accounting of employees.
- Identification of areas where employees can "shelter-in-place" if evacuating would be more dangerous.
- A strategy on how to contact employees who are traveling, off work, provide transportation of goods or services, work remotely, or work out of state.
- Procedures on how communication will work if telephone, including cell phone, communication is unavailable.
- A list of where emergency supplies can be found.
- And copies of important documents such as insurance, supplier contact information, contractors, and so on.

Emergency plans should be reviewed with employees at least twice a year and practiced. Employees are more likely to stay calm in emergencies if they know what to do and where to meet.

## Kits

It is important to remember that immediately following an earthquake, you and your employees may be on your own for a few hours to a few days. In addition to an emergency plan for earthquakes, you should have some survival kits on hand that can last you and your employees for a few days. Kits should include:

- Non-perishable food that can last a minimum of 3 days
- Can opener
- Moist towelettes
- Water (enough for each person) that can last a minimum of 72 hours.
- Walkie-talkies
- A battery powered radio. A NOAA radio is recommended
- First aid kits or supplies. This should include bandages, sterile gauze, anti-biotic ointment, ice packs, and so on
- Flashlights
- Extra batteries
- Whistles (these can be used to signal for help)
- Personal protective equipment (dust masks, respirators, safety glasses or goggles, work gloves, reflective vests, etc.)
- Basic tools
- Garbage bags and plastic ties for sanitation
- Toilet paper
- Tape
- Fire Extinguishers
- A disposable camera
- Emergency contact list
- Company documents
- Other emergency office supplies such as maps of the local area, spare keys, cash, plastic containers and so on

It is recommended that some supplies be stored outside of the building in the event that you or your employees cannot access the building after evacuating. Additionally, food and water should be rotated at least every three months, and first aid supplies restocked if they have been used.

*NOTE: Employees should be encouraged to create and keep their own emergency kits as well. These personal kits should be kept in easy to access areas in the event that employees need to evacuate. Kits should be stocked so employees can survive for a minimum of 72 hours.*

## DOCUMENTS

As mentioned in the previous section, you will want to keep copies of important documents with the emergency plan, in kits, or both. Additionally, you should check your insurance policy to make sure that it is up-to-date and that any new items have been added to the account.

For digital files, it is recommended that you have a back up storage system that is located off-site in the event the buildings computers or computer systems are damaged.

Additionally, businesses are encouraged to develop a business continuity plan so they can get back up and running as soon as possible. Such plans should include how the business will operate while repairs are taking place, a list of strategic partners, and so on.

# MANAGEMENT: EARTHQUAKE PREPAREDNESS

---

## CONCLUSION

To conclude, preparing for an earthquake will take some time and effort, but it will pay off when an earthquake hits. Effectively preparing for an emergency takes many working parts that come together including taking care of your building, coming up with an emergency plan, practicing the plan, putting kits together and storing them, and having a plan for how the business will continue after the quake. Remember, everyone in the company plays a part in safety.

## Capitol Connection Q&A for Contractors

Week of 4/19/21

I begin with a 'credit' check for one aspiring contractor, while another license applicant is concerned with a completely different 'experience' in the past. Sometimes having the desire to get a license, and working without one, requires a certain 'conviction'...

Q: I want to get my Contractor's License and some of my experience is from a long time ago and I know they will only consider experience within the last ten years. I only have two years of construction experience within the last ten years. Will the CSLB give me any credit for an AA degree from a Community College?

A: If your Associate Arts (AA) degree is in Building or Construction Management, the CSLB will give you up to one and a half years of experience credit. You will need to submit your sealed transcripts along with your license application and the CSLB will determine the months of experience credit based on the courses you completed. They typically give credit for the fields of construction, accounting, business, etc. You didn't mention it, but if you have military experience that may also be considered.

Q: What does the CSLB consider "advertising" for contractors?

A: The CSLB requires a license number in a wide range of promotional vehicles and stresses that advertisements are not limited to newspapers, radio, and TV commercials. They include; business cards, social media pages such as Facebook, Twitter, and Instagram. Other forms of advertisements: referral websites (Angie's List, Contractor Connection, etc.), any contract proposal, lettering on trucks and other vehicles, sign or billboards identifying a person or company as a contractor, electronic transmissions such as company's website content, any soliciting brochure, pamphlet, circular, or internet posted or distributed, and clothing or giveaway items that include the company name or logo, and any directory or listing that states or implies an individual is requesting or looking for the kind of work that requires a contractor's license.

Q: I have worked for a licensed contractor for several years, however I haven't been working for him for four years yet so I know I don't qualify for my own license yet. I have been doing work on the side, and when I advertise online I always specify that I'm not licensed and cannot do work over \$500. Just out of curiosity, if a project does happen to go over \$500 and I somehow get caught, what is the possible penalty?

A: First-time conviction penalties for unlicensed contracting include up to six months in jail may cost up to \$5,000 in fines. Penalties are more severe with each successive violation. A second conviction carries a mandatory sentence of 90 days in jail. That being said you'll want to make sure you don't take on a project that potentially may go over \$500 (*labor and materials combined*).

While knowledge is power, knowing where to go for the answers is half the battle.
