LOADING AND HAULING OF DRIED WATER TREATMENT SOLIDS FROM THE RANDALL-BOLD AND BOLLMAN WTP

Addenda: 0

4/26/21 11:00 AM 21-01048 Concord & Oakley **Public Works**

Plan Issuer: Contra Costa Water District-CCWD 925-688-8300 000-000-0000
 Prebid Conf: 4/14 @ 10-11 AM at Randall-Bold Water Treatment Plant, 3760 Neroly Road, Oakley Contract #: 2241
 and 11-12 PM at Bollman Water Treatment Plant, 2015 Bates Avenue, Concord

Project on an "as needed" basis, the Contractor will turn, load, haul, and dispose of dried solids from the Randall-Bold Water Treatment Plant and Bollman Water Treatment Plant. Dried water treatment solids shall typically exceed 45% solids by weight prior to disposal. Dried solids shall be hauled to the Ironhouse Sanitary District land spreading site at Jersey Island, California. The annual solids production at Randall-Bold plant is estimated at 9,000 cubic yards and 3,000 cubic yards at the Bollman plant at 50% solids by weight. The District will pay site disposal fees directly to the Iron house Sanitary District. The Contractor is responsible for maintaining and paying for all necessary hauling permits, and paying for loading and hauling the dried solids.

EMERGENCY OUTFALL IMPROVEMENTS PROJECT

Addenda: 3

4/27/21 11:00 AM 21-00984 Union City

\$1,200,000

Public Works

Plan Issuer: Union Sanitary District

510-477-7500

510-477-7509

Prebid Conf: 4/6 @ 9 AM via Zoom

Contract #: 800-494

The project is located at the northwest corner of the Alvarado Wastewater Treatment Plant near the south end of Veasy Street in Union City, CA and consists, in general, of the following work:

- Demolition and disposal of approximately 40 linear feet of 48-inch diameter pipeline.
- Replacement of approximately 20 linear feet of 48-inch diameter reinforced concrete pipe, RCP with centrifugally cast, fiberglass-reinforced, polymer mortar pipe, CCFRPM by open cut.
- Rehabilitation of approximately 61 linear feet of 48-inch diameter RCP by slip-lining.
- Construction of approximately 93 linear feet of 48-inch diameter CCFRPM by open cut.
- Construction of a concrete outlet structure consisting of a slab, headwalls, and wing walls.
- Placement of approximately 90 cubic yards of stone riprap for bank and channel protection.
- Removal and disposal of approximately 250 cubic yards of sediment to facilitate placement of the rip rap.
- Installation and removal of a temporary sheet pile cofferdam.
- Construction of an access vault and blow-off piping system on the existing outfall pipeline.
- Construction of a new riser pipe and cap on the new redundant pipeline.
- Dewatering of project excavations.
- Site restoration including final grading, paving, planting, and fencing.
- Survey of newly constructed facilities.
- Implementation of all mitigation measures in the Project's Mitigated Negative Declaration and Mitigation Monitoring and Reporting Plan.
- Bypass Contingency Allowance

Other work associated with the contract shall include, but not be limited to, mobilization / demobilization, clearing and grubbing, shoring and bracing of excavations, traffic control, erosion and sediment control, pipeline cleaning, debris removal and disposal, pre and post-rehabilitation closed circuit TV, CCTV inspection, and other items or details that are required by the Contract Documents.

PLEASE NOTE: All bidders submitting a bid must purchase a paper copy of the Project Manual from the District prior to the bid opening date.

PREQUAL: MOFFITT LONG HOSPITAL GROUND FLOOR STERILE PROCESSING DEPARTMENT RENOVATION/EQUIPMENT REPLACEMENT - UCSF

Addenda: 0

4/27/21	2:00 PM	21-01175	San Francisco	\$4,500,000 to \$5,000,000	Hospital
Plan Issuer: UCSF - Rebecca Palm-Song rebecca.palm@ucsf.edu				415-353-4038	000-000-0000
Contract #: 20-217					

The UCSF Medical Center Sterile Processing Department (SPD) project goal is to renovate the existing space, in a phased approach, to replace end of life equipment and make proper modifications to existing storage area to meet building and hospital code compliance requirements. This project is expected to improve workflow efficiencies, provide growth in capacity and volume without increasing labor expense. The SPD existing square footage is 7,334 sf. Original schematic design includes full equipment replacement and major modifications to existing operational and administrative spaces. Final project design will look to minimize schematic design to fit within allotted budget, The scope of work will include, but not be limited to, mechanical, electrical, plumbing, fire/life safety, and environmental controls.

Design and Preconstruction services will include, at a minimum, estimating, scheduling, constructability review, and bidding subcontractor design assist and construction bid packages, in addition to collaborating with other Project Team Members in good faith to achieve best value based on the University's Target Value Design and utilization of lean project delivery methods.

(This PreQual is a Re-Advertisement. Previously scheduled due date of 3/25/21)

ROSA PARKS ELEMENTARY SCHOOL PARKING LOT IMPROVEMENTS

Addenda: 3

4/27/21	2:00 PM	21-01002	San Francisco	\$270,000	School
Plan Issuer: SFUSD -- Betty Hong				415-355-6979	000-000-0000
Contract #: 12238					

Prebid Conf: MAND 4/13 @ 10 AM (meet at project site)

The Project is generally described as, but not limited to: removal of existing parking lot surface, and its replacement with new asphalt paving surface. The Work also includes select base rock removal and replacement under asphalt surface, restriping for parking lot spaces, building a trash enclosure area, replacement of select areas of chain link fencing around parking lot, trenchwork and excavation for underground utilities involving plumbing connections for a new drinking fountain and electrical work for a light pole, construction of a new landscaping strip, and all related mitigation of hazardous materials.

CASTENADA NO. 1 AND NO. 2 RESERVOIRS REHABILITATION, GLEN RESERVOIR DEMOLITION, AND MULHOLLAND RESERVOIRS ROOF MAINTENANCE - EBMUD

Addenda: 15

4/28/21 1:30 PM 21-00713 San Ramon, Lafayette & Orinda \$15,000,000 to \$18,000,000 **Public Works**

Plan Issuer: EBMUD-East Bay Municipal Utilities District 510-287-1040

Prebid Conf: 3/16 @ 9 AM & 3/18 @ 9 AM (See Notice to Contractors for meeting site location) Contract #: 2169

Work includes the rehabilitation of Castenada No. 1 and No. 2 steel reservoirs, the demolition of the Glen redwood reservoir, and roof improvements for Mulholland No. 1 and No.2 steel reservoirs. The Work includes demolition and removal of a redwood tank, steel reservoir roofs, and valve vaults; raising the height of steel tank walls; construction of aluminum dome roofs; repair of existing aluminum dome roofs; construction of valve vaults; abrasive blasting, priming, and coating of tank interiors and exteriors; and constructing civil, structural, mechanical, electrical, and pipeline improvements at the facilities. The reservoirs are located in San Ramon, Lafayette, and Orinda, respectively, in Contra Costa County, California.

PLEASE NOTE: The District will conduct two pre-bid jobsite inspection tours to familiarize prospective bidders with the project site and conditions. The inspections will be conducted on Tuesday, March 16, 2021 at 9 AM, and Thursday, March 18, 2021 at 9 AM. Attendees shall assemble at the Castenada Reservoirs site located at 5050 Crow Canyon Road, San Ramon. During the inspection tour, Attendees will also travel to Glen Reservoir located at the end of Monticello Road, Lafayette, and the Mulholland Reservoirs site located on Donald Dr, Orinda. This is the only time that the facilities will be open for inspection. The interior of the existing reservoirs will not be open for inspection. Each inspection will last approximately 1 hour. No photography by the Attendees will be allowed.

RFP FOR ODOR AND CORROSION CONTROL SERVICES

Addenda: 0

4/28/21 2:00 PM 21-00892 Santa Cruz

Public Works

Plan Issuer: County of Santa Cruz

831-454-2160

831-454-2385

Prebid Conf: MAND 4/6 @ 9am- 2750 Lode Street, Santa Cruz

The Santa Cruz County Sanitation District (District) invites sealed proposals for Odor and Corrosion Control Services from fully licensed, insured, bonded, certified CONTRACTORS to furnish all labor, tools, equipment, and incidentals required to provide services for the Santa Cruz County Sanitation District.

The District maintains 220 miles of gravity sewer mains, 14 miles of force mains, and 4,687 sewer manholes and 35 pump stations. The District encompasses the communities of Live Oak, portions of Aptos and Soquel and the City of Capitola. Our primary purpose is to maintain the sewer system transporting the wastewater to the City of Santa Cruz Wastewater Treatment Plant. The D.A. Porath Facility is the District's main facility and the average daily dry weather flows are approximately 3 million gallons per day before it is pumped to the City's treatment.

The District is soliciting bid proposals from qualified and experienced contractors to provide odor and corrosion control chemical, carbon media and services as detailed in this Specification.

The scope of this project shall include, but not be limited to:

- Provision of and delivery of chemical
- Provision of carbon and carbon change-out services
- Data collection
- Data Analysis
- Provision and installation of equipment and instrumentation
- Routine service and maintenance
- Remote Feed Adjustment Capability
- Remote H2S Monitoring
- Remote Tank Monitoring and Inventory Control Services
- Reporting

The term of this contract will be 2 (two) years with the option to extend for an additional 2 (two) one-year periods.

RFP HAZARDOUS WASTE SERVICES - CONTRA COSTA WATER DISTRICT

Addenda: 1

4/28/21 2:00 PM 21-01102 Various Cities

Public Works

Plan Issuer: Contra Costa Water District-CCWD

925-688-8300

000-000-0000

Contract #: 2230

The Contra Costa Water District (CCWD) is seeking the services of a qualified firm to provide hazardous waste contractor services. A qualified firm is one that possesses the licenses, personnel and equipment necessary to properly handle, transport and dispose of hazardous waste. The services will include planned non-emergency services (e.g., semi-annual disposal) and may include emergency spill response and homeless encampment cleanup.

RFP CORROSION CONTROL PROGRAM TECHNICAL SUPPORT SERVICES - CONTRA COSTA WATER DISTRICT Addenda: 0

4/29/21 11:00 AM 21-01132 Various Cities

Public Works

Plan Issuer: Contra Costa Water District-CCWD

925-688-8300 000-000-0000

Contract #: 2250

The District's water service facilities are typically located in Central and Eastern Contra Costa County and include various cathodic protection (CP) related systems for approximately 100 miles of metallic pipeline and 19 steel reservoir tanks. During the term of this services agreement the District is looking for a full-service Corrosion Control Engineering firm, to provide as-needed corrosion control technical services to assist in the operation, maintenance, troubleshooting, and construction of various existing or new CP systems. In addition to the aforementioned field-related services, the District may require other corrosion control support such as design consultation, maintenance practices recommendations, and training of District staff.

PREQUAL: PHTS IRM STAIR CORROSION REPAIR - UCSF

Addenda: 0

4/29/21 2:00 PM 21-01126 San Francisco \$800,000 **Hospital**
 Plan Issuer: UCSF - Tra Thanh tra.thanh@ucsf.edu 415-476-9437
 Contract #: PRJ-000119

Renovation/Remodel, 67,000 sq. ft. Lab Building, Institute for Regenerative Medicine (IRM)

1. Prepare and recoat all exterior surfaces of the Dolby Regeneration Medicine Building five exterior stairways including, stairs, structural support systems, and all associated structures in accordance with the Steel Structures Painting Council (SSPC) Painting Manual, Volumes 1 and 2, and the National Association of Corrosion Engineers (NACE), now merged into the AMPP (Association for Materials Protection and Performance).
2. Provide written evidence that workers to be used on the project have performed quality work and possess experience and knowledge in surface preparation and the application of high-performance industrial coatings.
3. Provide full Class 1 containment per SSPC/Guide 6, with 100% VOC/HAPS & HEPA particulate containment.
4. Conduct monitoring and testing to ensure that no emissions are present outside the containment.
5. Maintain general sound levels that will not affect routine facility, or UCSF research facility activities.
6. Provide design-build documentation for the scaffolding, including scaffolding structural calculations, for approval by UCSF prior to start of construction.
7. Protect HVAC equipment located below the stairs to prevent any debris, blasting grit or coating over spray from contact with this equipment.
8. Coordinate with UCSF Office of Environmental Health and Safety regarding hazardous materials testing and disposal.
9. Phase project to allow required ingress and egress to the occupied building.

The Prequalification Questionnaire will be submitted via BuildingConnected. To request an invitation to the Prequalification, go to UCSF BuildingConnected Plan Room at: <https://app.buildingconnected.com/public/55b2899376365309004aefcc>, join the "Bid Opportunity" and change your status to bidding.

4/29/21 2:00 PM 21-01142 Berkeley

School

Plan Issuer: UC Berkeley - Capital Projects

510-642-6273

000-000-0000

Contract #: 12803A

The Berkeley campus of the University of California requests that interested Consultants submit written statements of qualifications to provide geotechnical services for the Bechtel Engineering Center Addition and Renovation for the College of Engineering.

The Bechtel Engineering Center Addition and Renovation project will be located at the existing Bechtel Engineering Center. It is bounded by Davis Hall to the north; Hearst Memorial Mining Building to the east; Evans Hall to the south; and McLaughlin Hall and the West Plaza to the west. The existing Bechtel Engineering Center houses critical community functions, including study areas, an auditorium, the Engineering Library, and Engineering Student Services (ESS) offices. Bechtel Engineering Center is located on the northern edge of the Central Glade, an iconic landscape element of the campus's Classical Core, which is listed on the National Register of Historic Places.

RFQ FOR CONSTRUCTION MANAGEMENT, INSPECTION, AND TESTING SERVICES FOR THE THIRD STREET REHABILITATION PROJECT

Addenda: 3

4/29/21 4:00 PM 21-01141 San Rafael

Public Works

Plan Issuer: City of San Rafael-DPW

415-485-3355

Contract #: 11315

The City of San Rafael hereby requests Statements of Qualifications for Construction Management, Inspection, and Testing Services for the Third Street Rehabilitation Project. The following improvements are included in the Project scope:

01. Repaving the entire corridor.
02. Geometric and/or raised intersections will be constructed at several intersections. This may include curb ramps and widened sidewalks.
03. Additional work at intersections includes traffic signal replacement, controller upgrades, safety lighting, and other traffic control devices.
04. At Second Street/East Avenue and Third Street/Brooks Street new traffic signals will be installed.
05. The project will add class IV two directional bike lane from Marquard Avenue to Shaver Street.
06. The City's project includes Marin Municipal Water District (MMWD) and San Rafael Sanitation District (SRSD) pipeline replacement projects. While all work associated with the two pipeline projects will be bid and tracked separately including the construction management fees accrued by the firm selected. The pipeline replacement projects are estimated at over \$2 million dollars for MMWD and around \$1 million for SRSD. These are anticipated to be completed within the first half of the contract.
07. Additional utility improvements with the project include conduit and fiber installation for signal interconnect and future telecom fiber. This includes a bid alternative to extend fiber and conduit to a couple of the City's public buildings not on Third Street.
08. Drainage improvements include replacement of City infrastructure and repairs to a large box culvert under Second Street.
09. Landscaping is limited to tree installation and replacing median landscaping on Second Street and street trees along Second and Third Streets.

SUNNYDALE 3A & 3B DESIGN-BUILD FIRE PROTECTION, PV, AND EBM BID REQUEST (SUB BIDS REQUESTED)

Addenda: 4

5/4/21 2:00 PM 21-01065 San Francisco Mixed-Use

Plan Issuer: Nibbi Brothers Construction paris@nibbi.com 415-863-1820 415-863-1150
 Prebid Conf: 4/19 @ 10:30 AM (Virtual meeting. Please email Jacqueline Leiva at: jacqueline@nibbi.com to be invited to the call).

Baines-Nibbi Joint Venture has been selected as the General Contractor for the Sunnydale Block 3A & 3B Housing project in San Francisco. They are in receipt of the 100%DD Set and are currently requesting bid proposals from qualified subcontractors and suppliers including those certified with the San Francisco Contract Monitoring Department (CMD) as small business enterprises (SBE's) for Design-Build Fire Protection, Photovoltaic and Exterior Building Maintenance.

Block 3A (Lot 3) will contain a building consisting of 4 stories of type V construction over one story of type I. The ground floor will host an early childhood education center, retail and restaurants, a wellness center, and residential common spaces. The upper floors will contain residential units and service spaces.

Block 3B (Lot 4) will contain a building consisting of 4 stories of type V construction over one story of type I with a basement. The first story will host a garage serving both lots, retail and restaurants, and residential units. The basement will provide additional parking and maintenance space. The upper floors will contain residential units and service spaces.

SFUSD DISTRICT OFFICES ROOF REPLACEMENT AT 555 FRANKLIN STREET - 601 MCALLISTER STREET

Addenda: 2

5/5/21 11:00 AM 21-01058 San Francisco \$900,000 **School**

Plan Issuer: SFUSD - Simon Reyes reyess@sfusd.edu 415-355-6979 000-000-0000

Prebid Conf: MAND 4/15 @ 10 AM (meet at 555 Franklin St, Front Entry Steps, San Francisco) Contract #: 12248

The Project is generally described as, but not limited to: Removal of existing built-up roofing system and its replacement with single-ply TPO membrane roofing of two office buildings. The work involves the following:

- a. Removal of existing built-up roofing membranes.
- b. Provision of new single-ply TPO roofing membrane with insulation and coverboard.
- c. Provision of new sheet metal flashings and trims, roof drains.
- d. Exterior painting of penthouse louvers.
- e. Application of pedestrian deck coating and elastomeric wall coating.
- f. Increasing curb heights of roof-mounted mechanical equipment to suit new roof system.
- g. Disconnecting mechanical and electrical equipment on the roof and restoring their functionality as a result of roof demolition and new roof work.
- h. Abatement of hazardous materials where noted.

MISSION BAY BLOCK 9A DESIGN-BUILD FIRE PROTECTION & PHOTOVOLTAIC PANELS (SUB BIDS REQUESTED)

Addenda: 0

5/5/21 2:00 PM 21-01106 San Francisco

Residential

Plan Issuer: Nibbi Brothers Construction kristinm@nibbi.com

415-863-1820

415-241-2951

Prebid Conf: 4/21 @ 10:30 AM (Virtual meeting. Please email Jacqueline Leiva at: jacqueline@nibbi.com to be invited to the call).

Nibbi Brothers has been selected as the General Contractor for the Mission Bay Block 9A housing project in San Francisco. They are in receipt of the 100% DD set and are currently requesting bid proposals from qualified subcontractors and suppliers including those certified with the Office of Community Investment and Infrastructure (OCII)/Successor to SFRA for Design-Build Fire Protection & Photovoltaic Panels.

The 350 China Basin Street project consists of approximately 179,937 GSF sprinklered Type I-B (concrete superstructure + misc steel posts and beams at rooftop structures & misc. other locations), eight-story mid-rise residential building, 148 affordable for sale condo units including 1, 2, and 3-bedroom configurations. The Project will be approximately 89'-4" to the roof structure, as measured from the lowest entry point on the site (along China Basin Street). The proposed Project would include new sidewalks & street trees, utility infrastructure and landscaping as well as common, landscaped open space for residents at levels 02 and 09 Roof. The building design will incorporate sustainable building strategies to achieve LEED Silver or Green Point Rated.

STORM DAMAGE REPAIR OF THE NORTH STREET STEPS PROJECT

NCPA-CT1 SUBSTATION 115KV SF6 BREAKER REPLACEMENT PROJECT Addenda: 1

5/5/21 3:00 PM 21-01006 Alameda **Public Works**

Plan Issuer: Alameda Municipal Power 510-814-6429 000-000-0000

Prebid Conf: MAND 4/14 @ 10 AM at 2900 Main Street, Alameda Contract #: CS 01-21-02

Alameda Municipal Power (AMP) is the City of Alameda's not-for-profit electric municipal utility, serving residents and businesses for over 130 years. Its reliable electric supply system covers 23 square miles and provides power to more than 34,000 customers. AMP has two main substations namely Cartwright and Jenney Substations. AMP also maintains and operates certain electric facilities at Northern California Power Agency Combustion Turbine Project Number One Substation (NCPA-CT1). NCPA-CT1 substation is shared by NCPA and AMP for the former to interconnect the Combustion Turbine generator units and for AMP to distribute power to customers within the City of Alameda. AMP's 115-kV transmission system is fed from two separate radially connected lines coming from Pacific Gas Electric's (PG&E) Substations C and J, both located in Oakland, California.

The existing Westinghouse 121DWE40-2000A Sulfur Hexafluoride (SF6) insulated high voltage dead tank circuit breakers (CBs) CB212 and CB222 at NCPA-CT1 Substation served as the incoming main feeds from 115kV transmission lines connected to PG&E Station C and AMP Cartwright Substation. These SF6 CBs have been in service for over 35 years and have exceeded its service life. This project involves replacing two (2) SF6 CB with two (2) new Siemens Motor Spring Operating Mechanism SF6 CBs. CB tanks, motor operator/terminal cabinets, new CB structural steel support lattice pieces, and their associated parts have already been delivered and are currently stored at AMP Warehouse located at 1835 Oak Street.

PREQUALIFICATION WIDENING OF US 101 SB TO SR 87 SB CONNECTOR & US 101 SB ON-RAMP FROM STORY ROAD - SCVTA

Addenda: 4

SCOL70 **5/5/21 5:00 PM** 21-00241 Santa Clara County \$2,900,000 to \$3,500,000 **Public Works**
 Plan Issuer: SCVTA -Santa Clara Valley Transportation Authority 408-321-7189

Prebid Conf: Non-Mandatory 4/19 @ 10AM (Via Microsoft Teams) Contract #: C19240

At Location 1, the Project will widen the existing connector ramp to provide two standard 12-foot mixed flow lanes with standard inside and outside shoulders. The improvements involve restriping, pavement widening, reconstructing a lined trapezoidal ditch, and installing a new Traffic Monitoring System (TMS).

At Location 2, the Project will widen the existing diagonal on-ramp to add a standard 12-foot High Occupancy Vehicle (HOV) lane. The Project will also re stripe the adjacent Collector-Distributor (C-D) to Southbound US-101 to provide a standard 12-foot HOV lane. The improvements involve restriping, pavement widening, extending a reinforced concrete box culvert, and installing new ramp metering systems.

NEW RFQ GREEK THEATRE UPPER BOWL SAFETY AND LAWN RESTORATION PROJECT - UC BERKELEY

Addenda: 0

5/7/21 2:00 PM 21-01295 Berkeley

School

Plan Issuer: UC Berkeley - Capital Projects

510-642-6273 000-000-0000

Contract #: 12804A

The Berkeley Campus of the University of California is seeking an Executive Architect ("Consultant") to perform programming and conceptual design, schematic design, design development, construction documents, bid, construction administration and other support services as required by the Executive Design Professional Agreement ("EDPA") for the Greek Theatre Upper Bowl Safety and Lawn Restoration Project.

UC Berkeley/Cal Performances intend to upgrade the lawn seating area of the upper bowl within the Greek Theatre. The grass seating area of the upper bowl is too steep to occupy comfortably, as the patrons tend to slide down the hill, as a result the area is frequently underutilized during performances. The intent of this project is to decrease the slope from approximately 2.5:1 to approx. 4:1 slope and provide code compliant circulation in and around the upper bowl. The existing fire lane at the top of the upper bowl must be maintained.

NEW LUCIA CHILDCARE CENTER REOPENING RENOVATION - UCSF

Addenda: 1

5/11/21 2:00 PM 21-01306 San Francisco

Hospital

Plan Issuer: UCSF - Lisa Trogdon lisa.trogdon@ucsf.edu

415-502-4268 000-000-0000

Prebid Conf: MAND 4/27 @ 11 AM

Contract #: C1317501

PROJECT BACKGROUND AND DESCRIPTION:

The UCSF Lucia Child Development Center has been closed for months due to the COVID-19 pandemic. The center is planning a reopening in August 2021. Facilities Services is working with the staff to renovate the center prior to opening. The Project location is 610 Parnassus Avenue, San Francisco, CA 94122. The center's combined size is 2,501 sq. ft.

PROJECT SCOPE:

INTERIOR: (Refer to diagram on page 2.)

- Paint all interior space within orange outline. Remove all items off the wall to paint an off-white color. Match the existing blue paint on the arc that enters the play area with elevations. Paint the drywall on the ceiling off-white. Reinstall all the wall items, including re-bracing of the furniture. Exception: Avoid painting doors, door trims, ceiling panels, ceiling shades/windows, and storage rooms.
- Replace all the flooring within orange outline with a similar vinyl flooring design. Replace the carpet at the elevated steps area with new carpet. Replace all baseboards.
- Brace 2 additional shelf / cabinet that wasn't braced before.
- Deep cleaning of all interior space within orange outline. I.e. Wipe down of interior & exterior microwaves, fridges, and cabinets. Clean stove, sinks, and toilets. Wipe down all furniture, wainscot backsplashes, doors, and interior side of windows. Shampoo area rugs.
- Remove and discard clear acrylic wall bumper guard next to adult restroom entrance.
- Additive Item: Removal of the elevated flooring.
- Additive Item: Removal of 1 built-in changing station (south side) in the kid restroom. Patch wall tiles after removal.

YARD:

- Patch cement wall and paint left 3 sections with chalkboard paint. Paint the rest of the sections with outdoor paint.
- Patch the holes on the fence that is located across from the cement wall.

PLEASE NOTE: Only bidders who participate in the Job Walk will be allowed to bid on the Project as Prime Contractors. Participants shall meet at Corner of 3rd & Parnassus Avenues, San Francisco, CA, Sit Down Area. For further information, contact University's Representative, Linda Yu, at (415) 412-3844.

MWWTP ADMIN, LAB, AND DEWATERING BUILDINGS HVAC IMPROVEMENTS - EBMUD

Addenda: 3

5/12/21 1:30 PM 21-01158 Oakland \$4,410,000 to \$4,900,000

Public Works

Plan Issuer: EBMUD-East Bay Municipal Utilities District 510-287-1040

Prebid Conf: 4/20 @ 9 AM (Virtual meeting. If interested in attending Pre Bid Meeting and/or Job Walks, email Dominic La Marche at: dominic.lamarche@ebmud.com no later than April 16, 2021) Contract #: SD-402

Work for this Project will occur at the following four buildings located at the MWWTP: Administration Building, Laboratory Building, Dewatering Building, and Thickening Building. The Administration Building and Laboratory Building are adjoining structures and have a common HVAC system and will therefore be treated as a single building. Similarly, the Dewatering and Thickening Building are adjoining and share HVAC equipment and will therefore be treated as a single building and referred to as just "The Dewatering Building."

Work includes the following: Administration/Laboratory Building - Select demolition and replacement of existing 200 ton air cooled chiller, recirculation pumps, expansion tank and associated chilled water piping; select demolition of existing process chiller and replacement with 5 ton air cooled chiller; select demolition and replacement of 1,000 CFM exhaust fan and 1,000 CFM fumehood exhaust fan; demolition of existing built up roof and replacement with modified bitumen roof; installation of fall protection railing around perimeter of building roof; select demolition and replacement of chilled water pipe insulation within building's above ceiling space; installation of pipe supports on roof for future pipe; furnishing of temporary chiller to maintain building operation during construction; handling and proper disposal of debris and hazardous waste; and all required testing and training.

Dewatering Building - Select demolition and replacement of 45,000 CFM roof mounted vane axial exhaust fan; select demolition and replacement of 47,30 CFM roof mounted vane axial exhaust fan; select demolition and replacement of 40,000 CFM supply fan located in building mechanical room; modification of fiberglass and sheet metal ductwork; installation of exhaust dampers on supply and exhaust grilles; installation of split system; rebalancing of building ventilation system; handling and proper disposal of debris and hazardous waste; and all required testing and training.

PLEASE NOTE: Job Walks will be held on the following dates/times. Please see Notice to Contractors for meeting participation instructions.

Public Works

Plan Issuer: City of Walnut Creek - Public Works Department

925-943-5899 000-000-0000

Prebid Conf: 4/20 @ 11 AM via Zoom

Contract #: CP010042-2021

The City of Walnut Creek (City), through the Public Works Department, is seeking Statements of Qualifications (SOQs) from interested firms (Respondents) capable of developing, manufacturing, providing, and servicing/maintaining Heating, Ventilation and Air Conditioning (HVAC) building automation system infrastructure and software.

The City intends to select a HVAC BAS platform for managing HVAC energy use and comfort in larger City facilities, and for specification in existing facility retrofit and new facility construction project manuals. The selected BAS should allow the City to achieve greater energy conservation/efficiency, climate control and comfort, cost savings, and ease of use at several large and mid-sized City-owned facilities, as further described within this Request for Qualifications (RFQ).

NEW FIRE STATIONS 54 AND 55 **Addenda: 1**
5/13/21 2:00 PM 21-01265 San Rafael \$6,700,000 **Public Works**
 Plan Issuer: City of San Rafael-DPW 415-485-3355

Prebid Conf: MAND FIRE STATION 54 at 46 Castro Ave. at 10 AM. After the first visit, bidders are to continue to the second project site and will regroup approximately an hour later at FIRE STATION 55, 955 Point San Pedro Road) Contract #: 11394 & 11395

FIRE STATION 54 is located at 46 Castro St., San Rafael, California and consists of the following:
 The proposed 5,108 sf, two-story fire station will house three on-duty fire fighters. The shift duty is a 48-hour schedule resulting in a shift change every other day. 8 on-site parking spaces are provided to accommodate this shift change. The core facilities of the station include the following elements:

- Two apparatus bays
- Apparatus support spaces including a medical storage, Clean-up area, turnout storage and related janitor facilities
- Gym
- Station office
- Kitchen, dining, dayroom, and laundry room
- Private sleeping quarters with gender neutral restrooms
- Mechanical, electrical, communications rooms
- Elevator
- Emergency generator

FIRE STATION 55 is located at 955 Point San Pedro Rd., San Rafael, California and consists of the following:
 The proposed 4,869 sf, single-story fire station will house three on-duty fire fighters. The shift duty is a 48-hour schedule resulting in a shift change every other day. 7 on-site parking spaces are provided to accommodate this shift change and 1 van accessible parking space accessible to the public. (Temporary Fire Station will be on site located on west lawn area. Contractor shall maintain access to allow Fire Station staff to fully operate during construction). The core facilities of the station include the following elements:

- Two apparatus bays
- Apparatus support spaces including a medical storage, Clean-up area, turnout storage and related janitor facilities
- Gym
- Station office
- Kitchen, dining, dayroom, and laundry room
- Private sleeping quarters with gender neutral restrooms
- Mechanical, electrical, communications rooms
- Emergency generator
- Fueling station (see Alternate 1)

This Project is open to pre-qualified contractors ONLY. For the list of contractors that pre-qualified, please visit:
<https://www.cityofsanrafael.org/fire-station-54-55-pre-qualification-results/>. Bids from firms that did not qualify will be automatically disqualified.

000-000-0000

Contract #: 2016-07

Prebid Conf: MAND 5/3 @ 1 PM (meet at Milepost 5.08 of Lucas Valley Road)

This Project will install approximately 135 feet of retaining wall on the downhill side of the hairpin curve at mile post 5.08. The wall will consist of steel soldier piles, tie-backs and concrete lagging. The new wall location will allow for the horizontal realignment of Lucas Valley Road, increasing the horizontal curve radius from 44 feet (existing) to 65.5 feet (proposed). In addition to curve realignment, work will include a new roadway structural section including asphalt paving, aggregate base, concrete safety barriers, guardrail, culvert extension, arch culvert rehabilitation, concrete drop structure and rip rap for stormwater runoff energy dissipation, minor drainage improvements, upgraded traffic striping, signage and pavement markings, and traffic control.

Questions concerning the Bid should be submitted by email no later than 5 PM on Thursday, May 6, 2021. Bid Questions should be sent to Rachel Calvert at: RCalvert@marincounty.org. The email subject line must read: "Bid Questions for Lucas valley Road Curve Realignment at MP 5.08 Project".

Contract #: 05A2324

1. The purpose of this Agreement for Unsheltered Resident Encampment Site Waste Removal and Cleanup Services. Agreement is to set forth the terms and conditions under which Contractor agrees to provide services to the California Department of Transportation (Caltrans) on an on-call, as needed basis.

2. As a part of the HazWaste Services, Contractor shall furnish all labor Hazardous Waste Operations and Emergency Response (HAZWOPER) trained employees, tools, hand tools, materials, supplies (including disinfectant), Personal Protective Equipment (PPE's -hard hats, vests, gloves, respirators, boots, coveralls, etc.), equipment, incidentals, travel, and disposal services necessary for the cleanup and removal of all HazWaste Materials at the site. This includes, but it is not limited to, the landscaped areas of the freeways, highways, structures, bridges, confined spaces, and operating rights-of ways.

3. Contractor shall log, collect, bag, and label all personal property and other materials that are not HazWaste Materials as described in Section 10 of the Proposed Form of Agreement, Attachment 13.

4. Refer to the Proposed Form of Agreement, Exhibit A, which is attached to this IFB as Attachment 13 for a more complete description of services.

5. This is an on-call, as-needed Service Request based Contract.

REQUEST FOR STATEMENTS OF PRE-QUALIFICATIONS FROM INTERESTED ELECTRICAL CONTRACTORS (E-SOPQ) - ORINDA WTP DISINFECTION AND CHEMICAL SYSTEMS SAFETY IMPROVEMENTS - EBMUD

Addenda: 0

5/14/21	10:00 AM	21-01090	Orinda	\$157,000,000 to \$222,000,000	Public Works
Plan Issuer: EBMUD-East Bay Municipal Utilities District				510-287-1040	Contract #: 2139J

Notice is hereby given that the East Bay Municipal Utility District (hereinafter referred to as the "District") has determined that all Electrical Contractors sub-bidding on the Specification 2139 - Orinda Water Treatment Plant Disinfection and Chemical Systems Safety Improvements ("Project") shall be pre-qualified prior to submitting a sub-bid on the Project. It is mandatory that all Electrical Contractors who intend to submit a sub-bid for the Project ("Prospective Sub-Bidders"), fully complete the Electrical Subcontractor's Statements of Pre-Qualifications ("E-SOPQ") package, provide all materials requested herein, and be pre-qualified by the District to be on the final qualified sub-bidder's list. The final list of pre-qualified Electrical Contractors will be stated in the Project Bid Documents.

The District is upgrading existing facilities and constructing new facilities at the Orinda Water Treatment Plant (Orinda WTP), in the city of Orinda, California. The Orinda WTP is located north of Highway 24 and is bounded by Camino Pablo on the southwest and San Pablo Creek on the northeast. The primary goal of the Project is to construct and commission a new 200 million gallons per day (mgd) Ultraviolet (UV) Disinfection Facility and Chlorine Contact Basin (CCB). These facilities will enhance the Orinda WTP's disinfection capabilities. Attachment 2 shows the project site plan and rendered, plan and section drawings of the new disinfection complex.

The Project electrical work generally consists of:

- South Electrical Building - prefabricated power building with medium voltage transformers, medium voltage switchgear, redundant 48VDC battery systems, standby power low voltage switchgear with step up transformer, protection and automation controls, panelboards, transfer switches, dry type transformers, lighting and air conditioning.
- Los Altos Pumping Plant Power Building – prefabricated power building with medium voltage motor control centers, cast coil transformers, low voltage switchgear, protection and automation controls, panelboards, transfer switches, dry type transformers, portable generator switchboard, lighting and air conditioning.
- Maintenance and UV Electrical Building – major electrical equipment includes cast coil transformers, low voltage switchgear, protection and automation controls, panelboards, transfer switches, dry type transformers, uninterruptible power supplies, and portable generator switchboard. Work also includes disconnects, junction terminal boxes, lighting, receptacles, conduits and cables. Work includes installation of UV Vendor supplied control panels.
- UV Disinfection Facility - electrical equipment includes panelboards, dry type transformers, motor starters, disconnects, junction terminal boxes, lighting, receptacles, conduits and cables. Work includes installation of UV Vendor supplied equipment.
- Other miscellaneous facilities – electrical equipment includes panelboards, dry type transformers, motor starters, disconnects, junction terminal boxes, lighting, receptacles, conduits and cables.
- Site work - medium voltage and low voltage duct banks with underground pull boxes, temporary connections of existing facilities, permanent connections of existing and new facilities, Standby South Generator with fuel storage tanks, and site lighting.
- Raw water conveyance system improvements - replacement of three weir gates at the Briones Diversion Works (one 7' x 7' gate, two 6' x 7' gates), installation of new ultrasonic flowmeters at the OWTP north and south raw water channels.
- Chemical systems safety improvements - demolition and replacement of chemical feed systems for primary coagulant, coagulant polymer, sodium hypochlorite, ammonia, sodium bisulfite, caustic soda, and fluoride, including bulk tanks, pumps, and chemical piping from truck unloading to chemical injection, as well as temporary chemical feed and storage system for plant operation during construction of these improvements.
- Miscellaneous Items - Programming of protection and automation control systems. NETA testing of electrical systems. Factory and Field Testing. Start-up. Training.

The Project instrumentation work generally consists of:

- New and Existing Facilities - control panels, work stations, water quality analyzers, instrumentation, telephone system, fiber patch panels, CCTV system, access control system, fire alarm system.
- Testing of SCADA operation and testing of controls systems.
- Site work - expanded fiber distribution system.

REQUEST FOR STATEMENTS OF PRE-QUALIFICATIONS FROM INTERESTED TRENCHLESS PIPE INSTALLATION CONTRACTORS (TPI-SOPQ) - ORINDA WTP DISINFECTION AND CHEMICAL SYSTEMS SAFETY IMPROVEMENTS - EBMUD

Addenda: 0

5/14/21 10:00 AM 21-01089 Orinda \$157,000,000 to \$222,000,000 **Public Works**
 Plan Issuer: EBMUD-East Bay Municipal Utilities District 510-287-1040
 Contract #: 2139I

Notice is hereby given that the East Bay Municipal Utility District (hereinafter referred to as the "District") has determined that all Trenchless Pipe Installation CONTRACTORS sub-bidding on the Specification 2139 - Orinda Water Treatment Plant Disinfection and Chemical Systems Safety Improvements ("Project") shall be pre-qualified prior to submitting a sub-bid on the Project. It is mandatory that all Trenchless Pipe Installation CONTRACTORS who intend to submit a sub-bid for the Project ("Prospective Sub-Bidders"), fully complete the Trenchless Pipe Installation's Statements of Pre-Qualifications ("TPI-SOPQ") package, provide all materials requested herein, and be pre-qualified by the District to be on the final qualified sub-bidder's list. The final list of pre-qualified Trenchless Pipe Installation CONTRACTORS will be stated in the Project Bid Documents.

The District is upgrading existing facilities and constructing new facilities at the Orinda Water Treatment Plant (Orinda WTP), in the city of Orinda, California. The Orinda WTP is located north of Highway 24 and is bounded by Camino Pablo on the southwest and San Pablo Creek on the northeast. The primary goal of the Project is to construct and commission a new 200 million gallons per day (mgd) Ultraviolet (UV) Disinfection Facility and Chlorine Contact Basin (CCB). These facilities will enhance the Orinda WTP's disinfection capabilities. Attachment 2 shows the project site plan and rendered, plan and section drawings of the new disinfection complex.

The Project trenchless pipe installation work considered as part of this TPI-SOPQ generally consists of pipe jacking to construct the following:

- 108-inch pipe from the CCB to Effluent 1.
- 108-inch pipe from the CCB to Los Altos Pumping Plant No. 1.
- 48-inch pipe from the CCB to Los Altos Pumping Plant No. 2.
- 78-inch pipe from Effluent 1 to Effluent 2.

The pipes will be steel with a steel carrier pipe.

CONSTRUCTION OF MAIN LIFT ODOROUS EMISSIONS - CITY OF MILPITAS

Addenda: 0

5/14/21 5:00 PM 21-01087 Orinda

\$157,000,000 to \$222,000,000

Public Works

Plan Issuer: EBMUD-East Bay Municipal Utilities District

510-287-1040

Contract #: 2139H

Notice is hereby given that the East Bay Municipal Utility District (hereinafter referred to as the "District") has determined that all EXCAVATION SUPPORT CONTRACTORS sub-bidding on the Specification 2139 - Orinda Water Treatment Plant Disinfection and Chemical Systems Safety Improvements ("Project") shall be pre-qualified prior to submitting a sub-bid on the Project. It is mandatory that all EXCAVATION SUPPORT CONTRACTORS who intend to submit a sub-bid for the Project ("Prospective Sub-Bidders"), fully complete the Excavation Support's Statements of Pre-Qualifications ("EXC-SOPQ") package, provide all materials requested herein, and be pre-qualified by the District to be on the final qualified sub-bidder's list. The final list of pre-qualified EXCAVATION SUPPORT CONTRACTORS will be stated in the Project Bid Documents.

The District is upgrading existing facilities and constructing new facilities at the Orinda Water Treatment Plant (Orinda WTP), in the city of Orinda, California. The Orinda WTP is located north of Highway 24 and is bounded by Camino Pablo on the southwest and San Pablo Creek on the northeast. The primary goal of the Project is to construct and commission a new 200 million gallons per day (mgd) Ultraviolet (UV) Disinfection Facility and Chlorine Contact Basin (CCB). These facilities will enhance the Orinda WTP's disinfection capabilities. Attachment 2 shows the project site plan and rendered, plan and section drawings of the new disinfection complex. The Project excavation support work considered as part of this EXC-SOPQ includes construction of secant pile shoring systems to support excavations for:

- The primary excavation for the UV and CCB facilities
- Effluent 1 tie-in pit
- Effluent 2 tie-in pit

The secant piles are expected to extend up to 65-feet below grade. Tie-backs and/or internal bracing are anticipated to provide support for the shoring systems.

REQUESTS FOR STATEMENTS OF PRE-QUALIFICATIONS FROM INTERESTED GENERAL CONTRACTORS (GC-SOPQ) - ORINDA WTP DISINFECTION AND CHEMICAL SYSTEMS SAFETY IMPROVEMENTS - EBMUD

Addenda: 0

5/14/21	5:00 PM	21-01088	Orinda	\$157,000,000 to \$222,000,000	Public Works
Plan Issuer: EBMUD-East Bay Municipal Utilities District				510-287-1040	Contract #: 2139G

Notice is hereby given that the East Bay Municipal Utility District (hereinafter referred to as the "District") has determined that all General Contractors bidding on the Specification 2139 - Orinda Water Treatment Plant Disinfection and Chemical Systems Safety Improvements ("Project") shall be pre-qualified prior to submitting a Bid on the Project. It is mandatory that all General Contractors who intend to submit a Bid for the Project ("Prospective Bidders"), fully complete the General Contractor's Statements of Pre-Qualifications ("GC-SOPQ") package, provide all materials requested herein, and be pre-qualified by the District to be on the final qualified Bidder's list. The final list of pre-qualified General Contractors will be stated in the Project Bid Documents.

The District is upgrading existing facilities and constructing new facilities at the Orinda Water Treatment Plant (Orinda WTP), in the city of Orinda, California. The Orinda WTP is located north of Highway 24 and is bounded by Camino Pablo on the southwest and San Pablo Creek on the northeast. The primary goal of the Project is to construct and commission a new 200 million gallons per day (mgd) Ultraviolet (UV) Disinfection Facility and Chlorine Contact Basin (CCB). These facilities will enhance the Orinda WTP's disinfection capabilities. Attachment 2 shows the project site plan and rendered, plan and section drawings of the new disinfection complex.

The UV and CCB facilities will be constructed below ground on the site of an existing maintenance building. The excavation for these facilities will be shored using a secant pile shoring system, and its deepest point will be approximately 60 feet below existing grade.

Filtered water will flow to the UV Facility via a new 108-inch pipe to be installed via an open-face trenchless pipe jacking method. Similarly, disinfected water will flow from the CCB to the existing Claremont Tunnel via a new 108-inch pipe installed using trenchless methods. An additional 48-inch pipe, which will also be installed using a trenchless technique, will feed water from the CCB to Los Altos Pumping Plant No. 2 (LAPP2).

The Project includes four major water piping tie-ins:

- 48-inch tie-in to Effluent 1
- 72-inch tie-in to Effluent 2
- 48-inch tie-in to LAPP2
- 108-inch tie-in to Claremont Tunnel

The Project also includes numerous electrical, communications, chemical, and utility tie-ins.

A new two-story Maintenance and UV Electrical Building (MAUVE) will be constructed above the UV Facility to house the UV system electrical equipment and various District maintenance shops and related facilities. The Project also includes construction of a Grounds Maintenance Building and parking area for District staff.

The Project includes procurement and installation of two prefabricated power buildings that include medium voltage transformers, medium voltage switchgear, medium voltage motor control centers, cast coil transformers, low voltage switchgear, redundant 48VDC battery systems, standby power low voltage switchgear with step up transformer, protection and automation controls, panelboards, transfer switches, dry type transformers, and lighting and air conditioning. The Project also includes a new standby generator, fuel tank, and piping.

The Project includes an expanded fiber distribution system for both new and existing facilities, as well as new control panels, workstations, instrumentation, CCTV system, access control equipment, and fire alarm systems for the new facilities.

The Project also includes improvements to the chemical storage and feed systems, including demolition and replacement of chemical feed systems for primary coagulant, coagulant polymer, sodium hypochlorite, ammonia, sodium bisulfite, caustic soda, and fluoride, including bulk tanks, pumps, and chemical piping from truck unloading to chemical injection, as well as temporary chemical feed and storage system for plant operation during construction of these improvements.

Raw water conveyance system improvements are also part of the Project, including replacement of three weir gates at the Briones Diversion Works (one 7' x 7' gate, two 6' x 7' gates), installation of new ultrasonic flowmeters at the Orinda WTP north and south raw water channels, and inspection, repair, and expansion of siphons located at the OWTP south spillway to San Pablo Creek.

The treatment plant will be in operation during construction. Partial shutdowns of the plant will be allowed, and two complete plant shutdown period will also be permitted to make tie-ins to existing infrastructure. The anticipated duration of the construction project is 65 months.

NEW YOUTH SPEAKS/FIRST EXPOSURES TENANT SPACE B AT 265 SHOTWELL ST

Addenda: 2

5/17/21 4:00 PM 21-01248 San Francisco \$1,100,000 **Public Works**
 Plan Issuer: Stadler Architecture sstadler@stadlerarch.com 510-981-9813 000-000-0000
 Prebid Conf: MAND 4/22 @ 10 AM (meet in front of 2060 Folsom St, San Francisco to enter 265 Shotwell St)

SUMMARY OF WORK:

A. Work Covered by Contract Documents:

1. Location: The site of the Work is Tenant Space B at a site that borders on one side as 265 Shotwell St and the other side as 2060 Folsom St. The extent of the site is shown on the drawings.
2. Description: The Project consists of tenant buildout for Youth Speaks and First Exposures, two San Francisco nonprofits that support youth to express themselves with word and image.

Scopes of work for this RFP:

- Interior partitions and doors
- Interior finishes
- Selected replacement of exterior louvers and storefront windows
- Installation of suspended wood ceiling
- Installation of new VRF refrigerant unit on 10th floor on existing roof pad and connection to existing refrigerant lines and conduits
- New electrical panel for tenant space, installation of outlets, switches and connections for HVAC equipment
- New light fixtures
- Plumbing for sinks in dark room and common staff area.
- HVAC system
- Design/build of fire sprinkler system as required in addition to the existing fire sprinkler system of the shell building.

LBE/SBE Goals: The SBE goal for the entire project and this RFP has been set to 20%

Inquiries regarding this bid package should be directed to the Architect, Susanne Stadler, at: sstadler@stadlerarch.com with copy to the Construction Manager, Joe Blanco, at: jblanco@mack5.com

NEW HAPPY VALLEY ROAD EMBANKMENT REPAIR (REBID)

Addenda: 1

5/18/21 2:00 PM 21-01270 Alhambra Valley \$591,000 **Public Works**

Plan Issuer: Contra Costa County - Public Works Department 925-313-2000 000-000-0000

Prebid Conf: 5/3 @ 10 AM via Zoom Contract #: 0672-6U6215

Work generally consists of repair and restoration of a 250 foot stretch of northbound Happy Valley Road, approximately 0.2 mile southeast of the intersection of Happy Valley Road and Bear Creek Road. The work will reconstruct the northbound lane and restore two-way traffic to this portion of Happy Valley Road. The work includes installing an approximately 68 foot long soldier pile retaining wall with necessary safety railing and barrier on the east side of the roadway to support the reconstructed roadway and repairing settled roadway affected by the eroded embankment with structural backfill and asphalt surface. Drainage improvements will also be installed.

NEW RFQ FOR JOB ORDER CONTRACT (JOC) PROGRAM **Addenda: 0**

6/4/21 4:00 PM 21-01308 San Benito County **Public Works**
 Plan Issuer: County of San Benito 831-636-4170 831-636-4176
 Contract #: PW2021-003

The County's Resource Management Agency with the County of San Benito is seeking qualified consultant to provide professional services for the development, implementation and support of a Job Order Contract (JOC) Program from qualified service providers ("service providers"). The JOC program will include competitively bid, indefinite quantity contracts in which contractors bid an adjustment factor to present construction unit prices used to accomplish work needed for small size, multi-trade, minor construction, repair and remodel projects. The range of project complexity for JOC considered projects is varied and requires a provider to be fluent in the craft of project planning, scope definition and estimating, scheduling, and implementation. Many projects will require skilled labor in multiple project disciplines that range from carpentry, electrical contracting, HVAC contracting, concrete and asphalt pavement contracting. The JOC service provider providing professional service to the County is expected to coordinate these services with their approved network of contractors.

L TARAVAL IMPROVEMENT PROJECT SUNSET BOULEVARD TO WEST PORTAL - SFMTA

Addenda: 14

7/1/21 3:00 PM 21-00161 San Francisco \$90,000,000 Public Works

Plan Issuer: City & Co of San Francisco (SFMTA) allan.andaya@sfmta.com 415-701-4666 000-000-0000

Prebid Conf: 2/4 @ 10 AM (via Zoom. See Invitation for Bid for meeting participation details) Contract #: 1308R

The work under this Contract is to construct capital improvements along the L Taraval corridor between Sunset Boulevard and West Portal. The Work, as detailed in the Plans and Specifications, consists generally of the following:

01. Perform selective demolition of existing facilities.
02. Replace existing tangent paved embedded tie and ballast tracks along the L Taraval Line from Sunset Boulevard and Taraval Street to Forest Side Avenue and Ulloa Street with new direct fixation track and fastening systems, using 115# RE rails.
03. Replace existing track pavement with track concrete pavement within the track right-of-way.
04. Reconstruct Overhead Contact System (OCS), including poles and pole foundations, special work, trolley wires, tangent and feeder spans, insulators and various OCS components.
05. Renovate and reconstruct roadway pavement, parking strips and gutters, located between the sidewalk and the reconstructed trackway as well as at intersections.
06. Overlay the entire roadway with a 2-inch thick layer of asphalt concrete wearing surface from Sunset Boulevard to Forest Side Avenue along project alignment, except at trackway and the parking strips and gutters.
07. Construct temporary boarding platforms, as necessary.
08. Construct new boarding islands and high level accessible platforms and reconstruct or modify existing boarding islands and platforms.
09. Coordinate installation of bus shelters with electrical power feed for Next Bus signage on the boarding islands.
10. Construct and install architectural elements and components such as railings, trash receptacles, and bike racks.
11. Construct sidewalk bulb-outs and curb ramps.
12. Furnish and install and establish landscape planting.
13. Tree removal & stump grinding.
14. Install custom thermoplastic crosswalks.
15. Furnish and install new roadway lighting poles, fixtures and bracket arms, and relocate existing fixtures to new poles or combination trolley/streetlight poles.
16. Furnish and install new streetlight conduit, pull boxes, and underground and overhead service connections for streetlights.
17. Provide new traction power feeder cable grounding of new trolley poles.
18. Provide new traction power riser cables and multi-tap connectors for new trolley poles.
19. Provide new traction power feeder cables for existing sectionalizing switch and for feeder circuit WP-13.
20. Replace feeders in substation with new FBK type H breakers for feeder circuits T-1, T-2, and WP-13.
21. Add electrical current telemetry devices to feeder circuits T-1, T-2, and WP-13.
22. Upgrade Remote Terminal Unit (RTU) and annunciator units at Taraval and West Portal substations.
23. Upgrade Traction Power SCADA system at Taraval and West Portal substations and Power Control Center (PCC).
24. Provide new VTAG train signaling system at select locations.
25. Replace five (5) all way stop intersections with traffic signals and install intersection controller (IC) at each intersection.
26. Replace existing traffic signals.
27. Provide rapid rectangular flashing beacons.
28. Construct traffic signal conduit and pull boxes for future signalization and future interconnect fiber optic.
29. The Sewer Work to be performed includes but is not limited to constructing 12 to 30-inch diameter vitrified clay pipes and reinforced concrete pipes, cured-in-place lining 2'x3' and 2'-6"x3'-9" flat top concrete sewers, constructing new manholes, replacing side sewers, cured-in-place lining of existing side sewers, reconstructing culverts, mortaring manholes, plugging & filling existing sewer systems, performing post video inspections, and all other related work.
30. The work to be performed under this contract includes installing : approximately 20,000 linear feet of 4-, 6- and 8-inch ductile iron pipe; approximately 1,000 linear feet of 4-, 6- and 8- inch restrained joint ductile iron pipe; approximately 1,300 linear feet of 12-inch restrained joint ductile iron pipe; approximately 200 linear feet of 16-inch restrained joint ductile iron pipe; ductile iron joint fittings and valve assemblies; corrosion mitigation system; 1-inch to 8-inch service piping; pipe abandonment; open trench installation of nine (9) steel casings with ductile iron carrier pipe (restrained joint type) at Muni track crossings; and open trench installation of one (1) steel casing near 28th Avenue.
31. Replace all low pressure fire hydrants and add new fire low pressure hydrants and associated fittings and valves.
32. Provide all excavation and shoring at all connections, disconnections, and at service pits, where the work will be performed by SFWD.
33. Provide all excavation and excavation support work for PG&E hot tapping of deactivated gas mains.
34. Provide traffic control and support for all work.

(This Project is a REBID. Previously scheduled bid date was 9/12/19).
